MARYLAND DEPARTMENT OF TRANSPORTATION

## MISSION STATEMENT

The Maryland Department of Transportation is a customer-driven leader that delivers safe, sustainable, intelligent, exceptional, and inclusive transportation solutions in order to connect our customers to life's opportunities.

# FY 2025 – FY 2028 Maryland Statewide Transportation Improvement Program

**Section 1: Executive Summary and Project Information**

## 1.0 Introduction

The Fiscal Year (FY) 2025 to 2028 Maryland Statewide Transportation Improvement Program (STIP) is a four-year, fiscally constrained, and prioritized set of transportation projects, compiled from Statewide, local, and regional plans. The STIP is guided by the 2050 Maryland Transportation Plan (MTP), which establishes a long-term vision for Maryland's transportation network. The STIP contains federally-funded projects plus regionally significant State and local projects. The regionally significant projects located in the State's six Metropolitan Planning Organizations (MPOs), can be found in the MPO's Transportation Improvement Programs, included by reference in Section 2. All projects selected for funding through Maryland's planning process, both at the MPOs and in Maryland's non-Metropolitan areas, were consistent with the MTP and with federal transportation authorizations and qualify to receive available transportation funding.

Maryland's needs, priorities, and resources are reflected in the MTP mission, vision, guiding principles, and goals. The MTP guides transportation policies and investment strategies, with a focus on delivering exemplary customer service, leveraging federal dollars, and developing the necessary workforce to deliver projects on time and within budget.

The transportation system binds the State together. It connects Marylanders to jobs, goods, services, and each other. Delivering an efficient transportation system can enhance communities, protect the environment, drive economic mobility, and generate more capital investment. Every five years, Maryland law requires that MDOT update its long-range transportation plan, a planning document that reflects the application of programmatic transportation goals to project prioritization over a 20-year or longer planning horizon.

Informed by input from Marylanders, the MTP examines the most critical transportation needs, identifies noteworthy trends, and crafts statewide goals and objectives. The purpose of the plan is to identify strategies to help MDOT achieve these goals and objectives and provide the opportunity to work together to deliver a winning future for all Marylanders. The MTP is aligned with the Moore-Miller Administration's commitment to leave no one behind.

The MTP is informed by and informs future versions of the MDOT modal administration plans. The MTP is also informed by the WMATA Strategic Transformation Plan and the Moore-Miller Administration Guidance, MPO plans, long range plans from peer states, federal requirements, state priorities, public input, and stakeholder concerns. MDOT conducted extensive engagement both internally throughout MDOT and externally with its local, state, and regional planning partners, stakeholders, and the wider public. This included statewide outreach surveys, an Advisory Committee, an internal planning team and coordination with our MPO roundtable and at our Fall outreach tour meetings with the public and elected officials.

This STIP is prepared by the Maryland Department of Transportation (MDOT) in accordance with 23 CFR § 450.218, provisions of P.L. 117-58, Infrastructure Investment and Jobs Act (IIJA), 23 CFR § 450.216 and provisions of P.L. 114-94, Fixing America's Surface Transportation Act

(FAST Act), and all relevant previous federal authorizations. Maryland's STIP is developed through a collaborative effort between MDOT's five transportation modal administrations (State Highway Administration, Maryland Transit Administration, Maryland Motor Vehicle Administration, Maryland Aviation Administration, Maryland Port Administration), the Maryland Transportation Authority (MDTA), the Washington Metropolitan Area Transit Authority (WMATA), the State's six Metropolitan Planning Organizations (MPOs), metropolitan and non-metropolitan local officials, and the general public. Along with the Federal transportation legislation, particularly the FAST Act, MDOT's process for soliciting and integrating public involvement in transportation planning and decision-making is also guided by Maryland law. The MDOT Annual Consultation Tour Meetings, known as the Fall Tour, is the major outreach activity used in the development of the STIP, CTP, and the MTP when it's being updated, where the Secretary of Transportation visits with each county jurisdiction and the City of Baltimore to present the annual draft of Maryland's six-year capital investment program known as the Consolidated Transportation Program (CTP). All projects included in the STIP are in the CTP and receive this outreach to ensure that public needs and preferences are considered in transportation projects and that the public and local elected officials have opportunities to provide input and review project decisions.

The STIP contains the first four years of highway and transit project information directly from the final FY 2024 – FY 2029 CTP. The CTP/STIP Fall Tour provides the opportunity for the coordination, cooperation, and consultation between all affected stakeholders, and it effectively fulfils the intent of Infrastructure Investment and Jobs Act (IIJA) legislation, as well as regulations established in previous authorizations. The CTP development process is instrumental to the development of Maryland's STIP, the MPOs respective TIPs, as well as the rural elements. The transportation priorities guiding the CTP originate from the local jurisdictions from each MPO region and rural areas, that share their transportation priorities with MDOT and the Secretary at the Annual Tour each fall. Meetings are held with local jurisdiction staff before the Tour meeting. These meetings give local staff and MPO staff and members an opportunity to coordinate priorities and to hear firsthand from MDOT staff the current status of the CTP and the revenue and investments that have changed since the previous year.

The draft CTP becomes the basis for development of the metropolitan TIPs, which are submitted for inclusion and undergo independent consultation and coordination processes at the MPO staff and board levels. The state and federal financial forecast that supports the TIP is based on a six-year Financial Plan developed by MDOT that is updated semi-annually. The forecasted revenues and expenditures use the latest available economic estimates.

The STIP and MPO TIPs are based on conservative assumptions formulated from historical trends for projected funding. The MPO TIPs serve several purposes. It is the documentation of the intent to implement specific facilities and projects from the MPO Long Range Transportation Plans. It provides a medium for local elected officials, agency staff, and interested members of the public to review and comment on the priorities assigned to the selected projects.

. Not all available funding is programmed; as project needs change, the program will change to reflect the best and most efficient use of State and federal dollars through the day-to-day budgeting process. These changes will be reflected in more timely amendments and modifications.

Maryland's FY 2025 – FY 2028 STIP contains two parts.

**Section 1: Executive Summary and Project Information –** This section contains an overview of the STIP development process, demonstrates compliance with Federal and State law, and illustrates the vital role of public outreach and participation. This section also contains Appendices that support the development of the STIP, references the MPO TIPs, and lists the

rural non-MPO/Statewide projects and appropriate project groupings each fiscal year. This section demonstrates financial constraint by the revenues reasonably expected to be available through the STIP's funding period using year of expenditure dollars, and while not all available funding is programmed; as project needs change, the program will change to reflect the best and most efficient use of State and federal dollars through the day-to-day budgeting process. These changes will be reflected in more timely amendments and administrative modifications.

**Section 2: Metropolitan Planning Organization Transportation Improvement Programs (TIPs)** - This section presents each of the six MPOs TIPs without change as required by the Infrastructure Investment and Jobs Act (IIJA) of 2021.. Please reference the appropriate TIP for all urban area transit and highway surface transportation and regionally significant projects.

Details on MTA's rural non-MPO/Statewide area transit projects are located in Appendix H. Appendix I contains details for SHA's rural non-MPO/Statewide area highway projects.

The FY 2025 – FY 2028 STIP, all TIPs, and the FY 2024 – FY 2029 CTP, as well as previous STIP/CTPs, can be found on the web through MDOT's website for Regional Planning, mdot.maryland.gov/STIP, or on the on the MPO's websites:

## 2.0 Overview of Transportation Planning Agencies

Maryland offers its citizens a range of modal choices, with MDOT retaining responsibility for capital investments as well as operating and planning activities that reach across all modes of transportation. MDOT has a unique ability to deliver an expansive and integrated multimodal transportation system that provides a superior experience to the people and businesses it serves. MDOT houses all of the State's transportation modal agencies in one organization, enabling an integrated approach to planning and investment that results in seamless connectivity between Maryland's highways, toll facilities, transit, airports, ports, and motor vehicle and driver services. This organization is one Department instead of six separate entities; one Department with more than 10,000 employees working together towards the mission of ensuring that MDOT "provides safe, reliable, accessible, equitable, and sustainable transportation options to Marylanders across the State.

The MDOT Secretary serves as Chairman of the Maryland Transportation Authority (MDTA), which owns, operates and maintains the State's eight toll facilities. The Secretary is also the Chairman of the Port Commission and the Airport Commission. While the Washington Metropolitan Area Transit Authority (WMATA) is not part of MDOT, the Secretary serves as a Member of the WMATA Board and MDOT contributes funds to WMATA, the Governor appoints two Maryland WMATA Board members, and MDOT staff work closely with those appointees and the other Board members to ensure efficient and effective transit services in the metropolitan Washington region.

The Transportation Secretary's Office (TSO) establishes transportation policy and oversees five Transportation modal administrations: the Maryland Aviation Administration (MAA), the Maryland Port Administration (MPA), the Maryland Transit Administration (MTA), the Motor Vehicle Administration (MVA), and the Maryland State Highway Administration (SHA), and the Maryland Transportation Authority (MDTA).

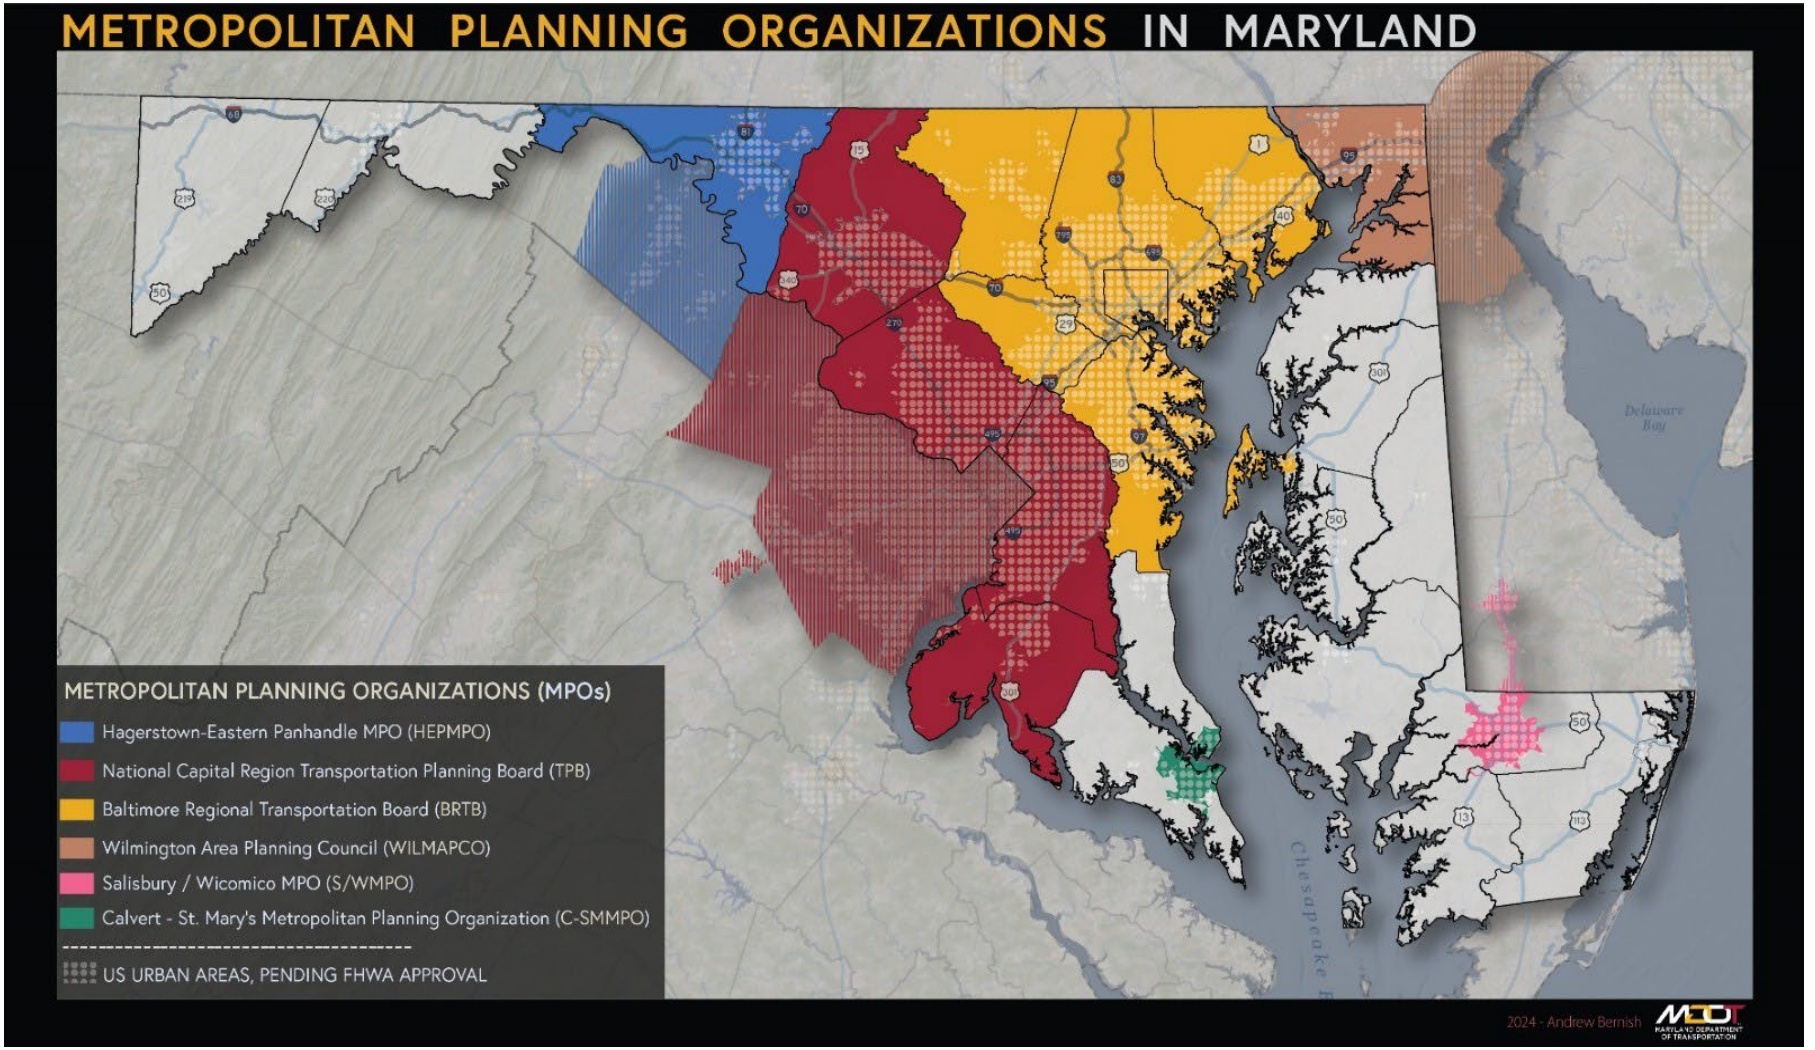

Federal highway and transit statutes require, as a condition for spending Federal highway or transit funds in urbanized areas, the designation of MPOs. MPOs are responsible for planning, programming, and coordinating Federal highway and transit investments. The MPO decision-makers include local elected officials, state DOTs, and the Federal Highway Administration (FHWA)/Federal Transit Administration (FTA). Maryland's metropolitan areas are divided into the following six MPOs, with some boundaries extending into neighboring states including Pennsylvania, Delaware, Virginia, West Virginia, and the District of Columbia:

- Baltimore Regional Transportation Board (BRTB);
- Calvert - St. Mary's Metropolitan Planning Organization (C-SMMPO);
- Hagerstown-Eastern Panhandle Metropolitan Planning Organization (HEPMPO);
- National Capital Region Transportation Planning Board (TPB);
- Salisbury/Wicomico Area Metropolitan Planning Organization (S/WMPO); and
- Wilmington Metropolitan Planning and Coordinating Council (WILMAPCO).

**Figure 2.1 illustrates the jurisdictions of Maryland's MPOs.**

**Figure 2.1 Maryland's Metropolitan Boundaries**

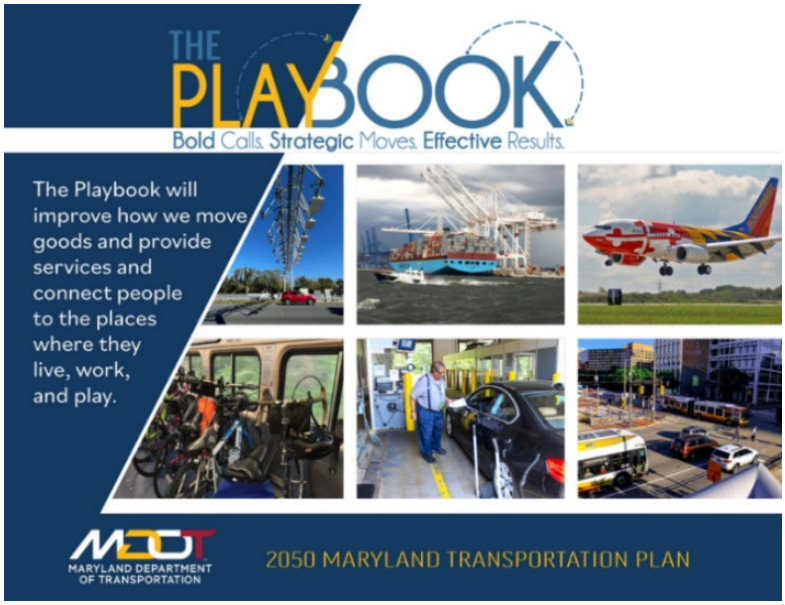

## 3.0 Key Transportation Planning Documents

### State Report on Transportation

Every year, as part of the Statewide multimodal transportation planning process, MDOT prepares and distributes the State Report on Transportation (SRT) to the Maryland General Assembly, local elected officials, and interested citizens. The SRT consists of three components: the *Maryland Transportation Plan (MTP),* the Maryland long-range transportation plan (currently called the Playbook), the *Consolidated Transportation Program (CTP),* the six-year capital budget, and the *Annual Attainment Report on Transportation System Performance (AR)*. All of these reports can be found on the MDOT Programming website: www.ctp.maryland.gov.

### *The 2050 Maryland Transportation Plan (MTP) Playbook*

MDOT works to deliver safe, sustainable, intelligent, exceptional and inclusive transportation solutions across Maryland. The 2050 Maryland Transportation Plan (MTP), called the "Playbook" (mdot.maryland.gov/MTP), was published in January 2024. The Playbook is a guiding document that sets the 20-year, long-range vision for the State's transportation system and guides transportation policies and investment strategies for all modes of transportation, including highways, roads, tunnels, bridges, rail, buses, water ports, airports, bike paths, and sidewalks. MDOT measures transportation system performance against these goals and objectives in the annual Attainment Report (mdot.maryland.gov/AR). See MDOT's web site for more information about the Playbook (mdot.maryland.gov/MTP).

As prescribed by both State and federal law, MDOT updates the Statewide transportation plan every four to five years to address current and future transportation challenges, needs, and conditions.

The Playbook has four goals outlining how the State of Maryland will move goods and services and connect people to the places where they live, work and play. The Playbook clearly outlines Maryland's vision to provide safe, reliable, accessible, equitable, and sustainable transportation options to Marylanders across the State. Further, the Playbook will advance the **Governor's State Plan and priorities** (governor.maryland.gov/priorities), leaving no one behind.

**MDOT's Vision and Mission:**

The 2050 Maryland Transportation Plan (MTP), the "Playbook," will improve how MDOT moves goods and services and connect people to the places where they live, work and play. The Playbook clearly outlines ***MDOT's vision*** to provide safe, reliable, accessible, equitable, and sustainable transportation options to Marylanders across the State. Everyone has a part to play in planning, delivering, and operating Maryland's multimodal transportation system.

MARYLAND DEPARTMENT OF TRANSPORTATION

**MISSION STATEMENT**
The Maryland Department of Transportation is a customer-driven leader that delivers safe, sustainable, intelligent, exceptional, and inclusive transportation solutions in order to connect our customers to life's opportunities.

## Goals

- Enhance Safety and Security
- Deliver System Quality
- Serve Communities and Support the Economy
- Promote Environmental Stewardship

Descriptions of the four goals and five guiding principles are included below.

The goals show, at the highest level, what MDOT plans to do, and how the transportation system will serve Maryland. Each goal has associated actionable objectives and strategies MDOT will implement to achieve those goals.

The MTP guides the development of the second component of the SRT, the *Consolidated Transportation Program* (CTP), Maryland's six-year constrained capital program. The CTP contains all capital projects funded with the Maryland Transportation Trust Fund (TTF).

Figure 3.1 illustrates the TTF funding sources (also found on page 12 of the Final FY 2024 – FY 2029 CTP).

Maryland's transportation system is funded through several dedicated taxes and fees, federal aid, operating revenues, and bond sales, which are assigned to the Transportation Trust Fund. This fund is separate from the State's General Fund, which pays for most other State government operations and programs. MDOT's customers pay user fees for transportation infrastructure and services through motor fuel taxes, vehicle titling taxes, registration fees, rental vehicle sales tax, and operating revenues. Operating revenues include transit fares and usage fees generated at the Port of Baltimore, BWI Marshall Airport, and Martin State Airport.

In addition to these State-sourced revenues and federal aid, MDOT utilizes other capital funding sources to fund its capital program. These other capital funding sources include funding from State General Obligation bonds, direct federal aid received by WMATA, Grant Anticipation Revenue Vehicle (GARVEE) bonds, airport revenue bonds, airport passenger facility charge revenues, airport rental car customer facility charge revenues, and local contributions.

In total, MDOT's operating and capital spending from all fund sources, including nonbudgeted capital funding, is $41.3 billion over the six-year period (Source: Final FY 2024 – FY 2029 CTP). MDOT continually looks for opportunities to maximize its financial resources by leveraging alternative financing sources such as alternative forms of debt, partnering with local jurisdictions and private entities, and applying for competitive federal grants. Funding programmed in the current six-year program are shown in the Where the Money Comes From pie chart (Figure 3.1).

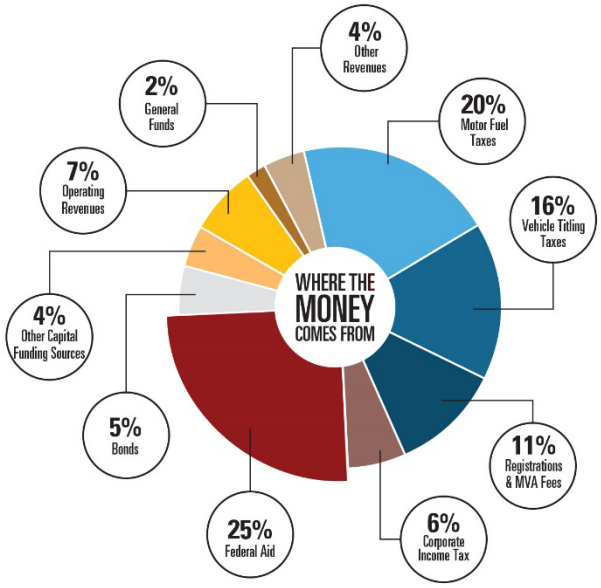

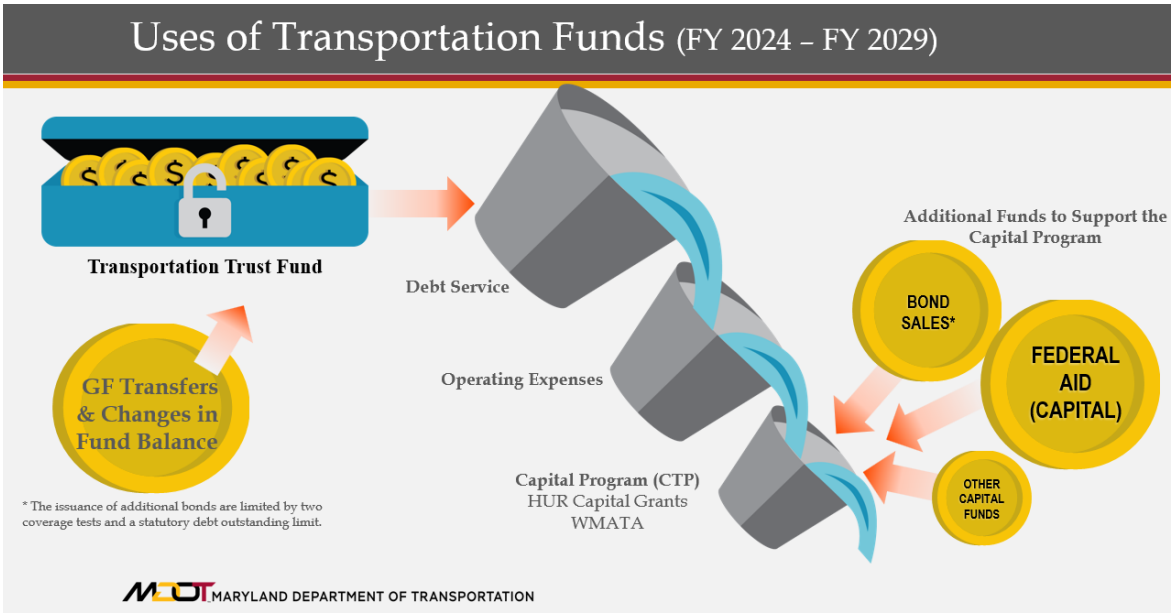

**Figure 3.1 Transportation Trust Fund Sources, FY 2024 – FY 2029 CTP**

Debt service repays the Consolidated Transportation Bonds issued by MDOT to help fund its capital program. After operating costs and debt service, the remaining funding goes toward capital projects. This CTP totals $20.2 billion, including $2.2 billion for capital grants to Maryland's counties, municipalities, and Baltimore City for local transportation needs. The CTP is funded with $9.3 billion from the Transportation Trust Fund, $8.3 billion from federal aid, and $2.5 billion from other capital funding sources (Source: Final FY 2024 – FY 2029 CTP).

In 2010, the Maryland General Assembly passed a bill intended to enhance transparency and accountability in the evaluation and selection of proposed major capital projects for the CTP/STIP. The resulting Maryland State law, Chapter 725, requires MDOT and other proposing entities clarify the relationship between their prioritized projects and the overarching State goals for transportation as articulated in the MTP. In addition, full consideration of related goals and policies must be considered in the selection criteria.

In 2016, the Maryland General Assembly passed a bill that mandates MDOT "shall, in accordance with federal transportation requirements, develop a project– based scoring system for major transportation projects using the goals and measures established under [Transportation Article 2-103.7(c)]" being considered for inclusion in the CTP. The transportation scoring law, as amended in 2017, defines a "major transportation project" as a highway or transit capacity project that exceeds $5,000,000, and excludes any "projects that are solely for system preservation."

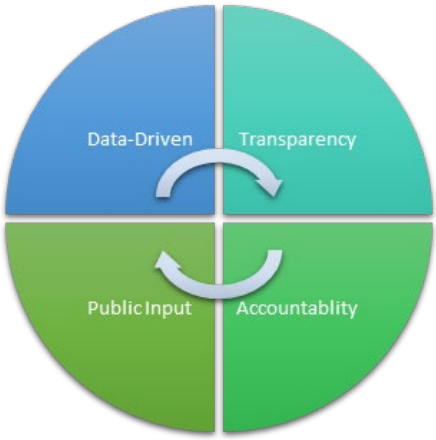

Using the nine goals and twenty-three measures established by this statute, the Chapter 30 scoring model seeks to evaluate projects across Maryland by utilizing project data, modeling analysis, and qualitative questionnaires to formulate a scoring matrix. A project application process has been established for counties and municipalities to request the inclusion of major transportation projects to ensure the necessary project information is provided to conduct the scoring. Each major transportation capacity project scored is then ranked. The project rank is one of many factors that contribute to the selection process for funding and inclusion in the CTP.

Over the last year, MDOT has been working to update the previous Chapter 30 model and develop a new project prioritization effort for surface transportation projects. This recommendation came from MDOT Secretary Wiedefeld and the Maryland Commission on Transportation Revenue and Infrastructure Needs (the TRAIN Commission), which was established by Chapter 455, Acts of 2023, to review, evaluate, and make recommendations on the prioritization and funding of

transportation projects. Through the recommendations by the TRAIN Commission, consultation with the modes and MDOT leadership, MDOT has drafted a new prioritization process that upholds Governor Moore's vision to deliver a data-driven, performance-based project prioritization process that maximizes the transportation value to Maryland.

The new prioritization process reflects MDOT's commitment to the following:

- **DATA-DRIVEN DECISION-MAKING:** Evaluate potential capacity projects using data-driven objective analysis to create a ranking of all potential new projects
- **TRANSPARENCY & ACCOUNTABILITY:** Be accessible, transparent, and accountable
- **ALIGN WITH GOALS & VALUES:** Make certain that new projects do the most they can to advance State's values and the goals set in the Maryland Transportation Plan
- **PUBLIC ENGAGEMENT:** Enable continuous public feedback and input to ensure the project prioritization objectives remain current and impactful

By integrating robust data with community input, MDOT aims to select projects that achieve meaningful and measurable outcomes for Marylanders while remaining adaptable to evolving needs. More information can be found at: www.mdot.maryland.gov/Prioritization.

The final component of the SRT is the *Annual Attainment Report on Transportation System Performance* (AR). During the 2000 General Assembly session, the Legislature passed a law requiring MDOT to submit the AR to accompany the MTP and CTP. The purpose of the AR is to demonstrate progress towards achieving the goals and objectives of the MTP and the delivery of the CTP. The AR tracks performance measures for MDOT, touching all of the MDOT modal administrations and MDTA and sets both long- and short-term performance targets.

MDOT is a performance driven organization, assessing transportation system performance through data before making decisions to plan and invest. The performance measures presented in the AR are intended to help MDOT and Maryland's citizens better understand and assess the relationship between investments in transportation programs and projects with the services and quality they provide. The AR tracks MDOT's progress each year towards attaining the goals and objectives of the MTP based on outcome-oriented performance measures. More information can be found at: mdot.maryland.gov/AR.

**Highway Needs Inventory**

Mandated by Annotated Code of Maryland §8-610, the Highway Needs Inventory (HNI) is an MDOT SHA planning reference document that identifies transportation needs to serve existing and projected populations and economic activity in Maryland as well as safety and structural concerns that warrant major construction or reconstruction. Triennially, MDOT SHA Regional and Intermodal Planning, in coordination with local jurisdictions, MDOT SHA districts, MDOT SHA Data Services, MDOT SHA Project Management, the MDOT SHA Office of Traffic and Safety, and the MDOT SHA Office of Real Estate, identifies transportation needs to include in the HNI. The needs identified in the HNI represent only an acknowledgment of need based on technical analysis and adopted local and regional transportation plans.

The HNI is neither financially constrained nor is it based on revenue forecasts. The HNI is not a

construction program and inclusion of a need does not represent a commitment to implement improvements. The HNI is a source document for MDOT SHA's portion of the CTP and is available at www.roads.maryland.gov/mdotsha/pages/Index.aspx?PageId=509.

**Metropolitan Planning Organization Transportation Plans and Programs**

Maryland's six MPOs are charged with developing a 20-year Long-Range Transportation Plan (LRTP) and a short-term four to six-year program called the Transportation Improvement Program (TIP). LRTPs help MPOs review how their region is changing and growing in order to determine future transportation needs and act as a tool to channel transportation investments where they can be most effective to meet the region's transportation needs. TIPs allow MPOs to review and approve all plans and programs of regional significance that involve federal funds. TIPs generally reflect local needs, priorities, and available funding in coordination with local transit providers, land use, and other local government officials, citizens, and other stakeholders. For example, the TIP must also show the year of expenditure and what types of funding will be used, and each project must be described in detail, including project cost.

LRTPs and TIPs cannot lead to further degradation of the region's air quality. To ensure that air quality standards are met and maintained, the United States Environmental Protection Agency (US EPA) has outlined regulations from the Clean Air Act (CAA) that require MPOs and state DOTs to provide state air agencies, local air quality agencies, and transportation agencies the opportunity for consultation regarding the development of the State Implementation Plan (SIP), the TIP, and associated conformity determinations for areas experiencing air quality problems. This is determined through the transportation conformity process. MDOT maintains proactive relationships between the Maryland Department of the Environment (MDE) and the agencies responsible for conformity ensuring a successful conformity process.

Each MPO has an approved, documented, and required public involvement process that is used in support of developing their respective LRTPs and TIPs. MDOT has also developed a public involvement plan which serves to guide public involvement outside the National Environmental Policy Act process. The public participation process for this STIP and all the Transportation Improvement Programs referenced by this document will also meet the Federal public participation requirements.

The Cumberland Area Metropolitan Planning Organization (CAMPO) population in the 2020 U.S. Census fell below the 50,000-threshold necessitating a Metropolitan Planning Organization (MPO). In compliance with the USDOT urban transportation planning guidelines, MDOT worked with the local elected officials in Cumberland, MD and the Allegany County planning staff to de-designate the CAMPO. The Allegany County Commissioners approved a Resolution at their October 5, 2023 meeting, disbanding the MPO effective June 30, 2024. The letter signed by Governor Wes Moore was sent to the USDOT on November 11, 2024.

STATE OF MARYLAND
OFFICE OF THE GOVERNOR

WES MOORE
GOVERNOR

November 4, 2024

The Honorable Pete Buttigieg
Secretary
United States Department of Transportation
1200 New Jersey Avenue, S.E.
Washington DC 20590

Dear Secretary Buttigieg:

By copy of this letter, I hereby disband the Cumberland Area Metropolitan Planning Organization (CAMPO) in Maryland. The CAMPO population in the 2020 United States Census fell below the 50,000-threshold necessitating a Metropolitan Planning Organization (MPO). The Urbanized population for Cumberland fell by 5,603 to 46,296. This continues a downward trend from Census to Census, and the expectation is that the trend will continue to the 2030 Census. In compliance with the United States Department of Transportation's (USDOT) urban transportation planning guidelines, the Maryland Department of Transportation (MDOT) has worked with the local elected officials and county planning staff to de-designate the CAMPO.

The 1980 United States Census created the Census-defined urbanized area, which led to the formation of CAMPO as the MPO. The CAMPO was first established on May 17, 1982, and re-designated on December 13, 2012. The attached Resolution No. 23-29 of the October 5, 2023, Allegany County Commissioners Meeting shows the intent of the county to disband the MPO effective June 30, 2024, and the attached letter signed by the Mayor of the City of Cumberland, Raymond Morriss, shows the largest incorporated city's support for the action.

This letter serves as the formal de-designation of the CAMPO. If you have any questions or require additional information, please do not hesitate to contact Mr. Geoff Anderson, MDOT Chief of the Office of Planning, Programming, and Project Delivery (OPPPD) at 410-865-1275, toll-free at 1-888-713-1414, or at ganderson4@mdot.maryland.gov. Of course, you may always contact me directly.

Sincerely,

Wes Moore
Governor

## ■ 4.0 Maryland's Statewide Transportation Improvement Program (STIP) Development

### Process Overview

The STIP development process begins with the MTP and MPO LRTPs (see Figure 4.1). These long-range plans are the foundation for transportation planning in Maryland. The STIP components are identified through a cooperative process between MDOT, the Transportation modal administrations, SHA District Engineers, and county staff. MPOs conduct regular meetings to coordinate transportation planning efforts. The Highway Needs Inventory and Priority Letters contain specific project lists. The Annotated Code of Maryland Title 8, section 612(c) states:

> "the local governing body and a majority of the local legislative delegation shall establish a list of priorities from among those secondary system projects listed in the needs inventory and the Administration shall engage in initial project planning upon the request of the local governing body and a majority of the local legislative delegation in the order established in the list of priorities."

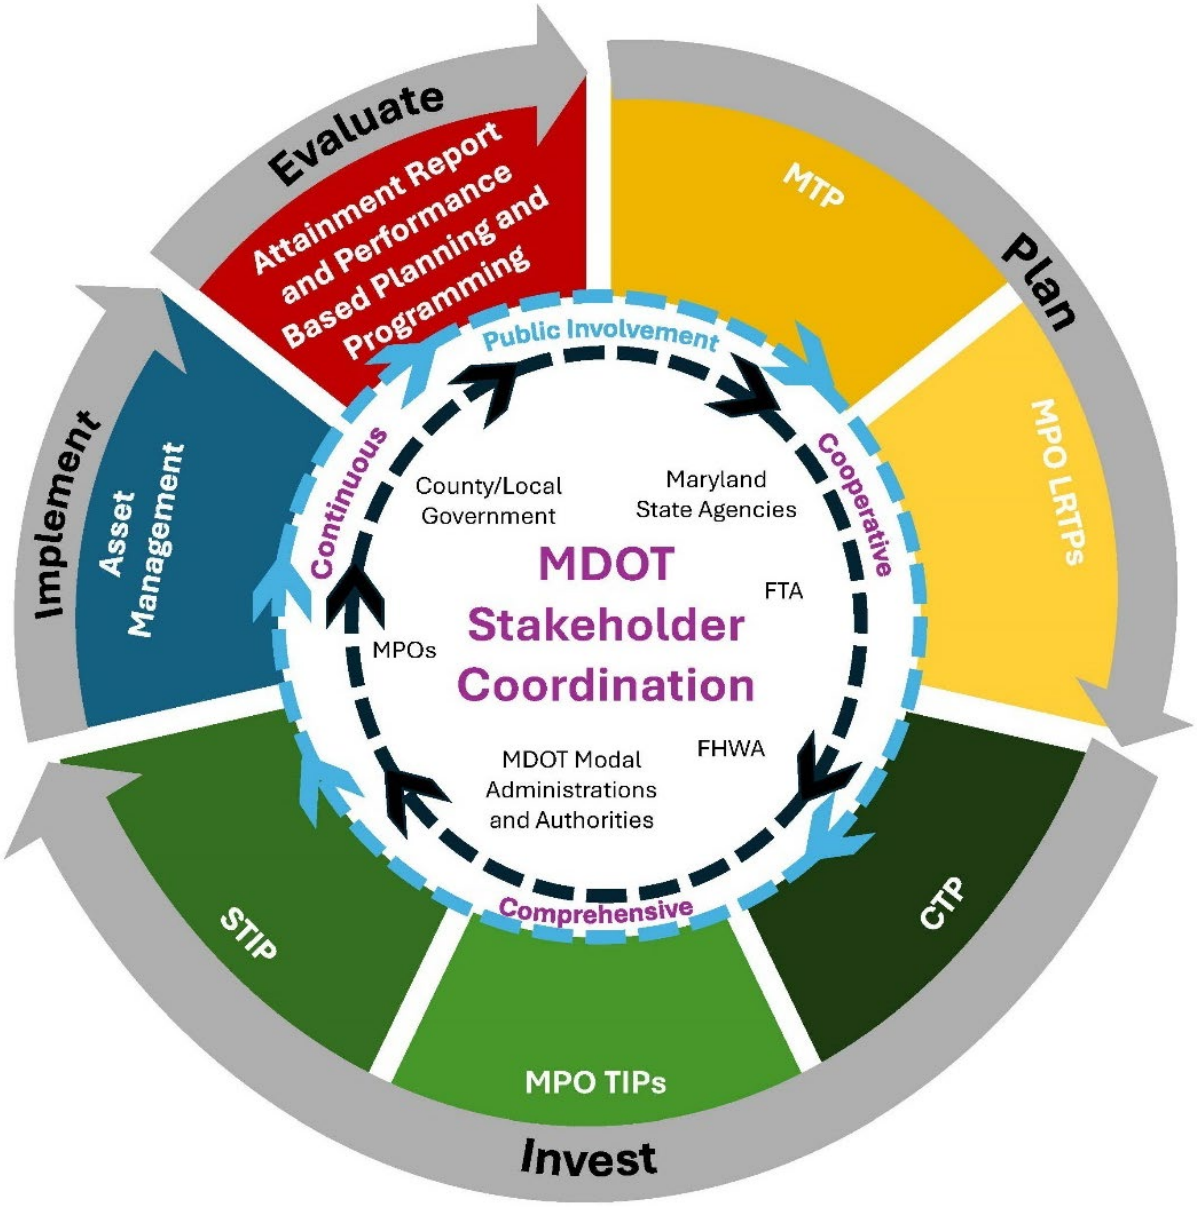

In other words, the Priority Letter represents each county's own internal ranking of projects deemed most important based on local need and local input. This is an effective way for counties to convey to MDOT the need for specific transportation projects and investments. Priority Letters involve requests for a wide variety of project funding – from transit improvements, highway reconstruction, and sidewalk construction to bridge improvements, bike path development, and highway safety projects.

In some cases, counties reserve portions of their own funds in order to accelerate project implementation, conduct feasibility and planning studies, ensure that projects are kept on-track, and provide a funding match as required for certain types of projects. In almost all cases, matching funds are provided by the local or state agency sponsoring the project. Rare circumstances where matching funds are provided by a private source or another local or state agency are noted in the project and are reasonably expected to be available. The modal share (highway, transit, etc.) of the projects listed in Priority Letters ranges from county to county. In more heavily populated and densely developed counties, there is a stronger focus on public transportation and improving access to public transportation from roadway networks. Counties with smaller populations and lower densities tend to focus on highway and arterial improvements, although most counties request some element of transit funding.

MDOT has been working to update the priority letter guidance as well as create an online form with a common deadline in order to facilitate the submission of county priorities. It will clarify priorities by category and allow the State to better review all of the priorities throughout the State when developing the Draft CTP. More information can be found online at: https://mdot.maryland.gov/tso/pages/Index.aspx?PageId=84.

**Figure 4.1 STIP Development Process**

Priority letters are typically received in the spring-summer as the draft CTP is developed. All recent priority letters can be found on the MDOT website: https://www.mdot.maryland.gov/tso/pages/Index.aspx?PageId=82. MDOT conducts several meetings with county staff, MPOs, and SHA district engineers to discuss the priorities listed. At the end of the summer, MDOT meets with local officials at the Maryland Association of Counties conference to continue discussions about priority projects.

Once the official draft CTP is complete, MDOT conducts the Annual Consultation Process, also known as the Fall Tour where the Secretary of Transportation and the Transportation modal agencies' Administrators visit each of the State's 23 counties and Baltimore City to present and solicit input on the projects and programs in the draft CTP. In preparation for the Tour, MDOT conducts staff level meetings with each of the Counties and Baltimore City, called the Pre-Tour to solicit staff input prior to the actual Tour. At the Tour itself, local elected officials, State legislators, and members of the public are generally present at these meetings. Table 4.2 lists the 2023 CTP Fall Tour schedule

** Highlights reference changes throughout the Tour meetings*

After the Fall Tour, MDOT reviews any comments and concerns and uses this input, along with updated revenue forecasts, to develop the final CTP. Once the final CTP is approved by the legislature, the federally funded and regionally significant projects are submitted for inclusion and approval in Maryland's six MPO's LRTPs and TIPs.

The MDOT modal administrations, local governments, and transit agencies all submit their projects, which are reviewed by MPO technical committees and boards for federal planning and policy compliance, undergo a public feedback and comment process, and are only approved after all metropolitan planning criteria are met. There have been many instances in past plans and TIPs whre projects have been removed or had elements of the project change throughout the MPO 3 C process. When an MPO TIP is approved, it is submitted as an amendment to the STIP to FHWA and FTA for review and approval. All future changes to projects between major TIP approvals are processed by amendment or administrative modificationall projects are updated into the six MPO TIPs and the STIP.

MDOT also engages in a range of consultative activities with representatives of local agencies and elected officials from Maryland's non-metropolitan areas. In fact, a number of organizations and groups representing Maryland's rural counties and transportation interests regularly present before the General Assembly and Secretary of Transportation to communicate their needs and lobby for specific projects and funding initiatives, such as the Transportation Association of Maryland – a Statewide advocate of public, private, and non- profit transit agencies.

Other activities include SHA District Offices, where continuous relationships with local agencies and officials help to identify highway, transit, and other transportation capital needs for inclusion in the STIP and CTP. MDOT also attends Maryland Municipal League meetings and the Maryland Association of Counties meetings as another way to foster transportation planning coordination. The Maryland Non- Metropolitan Consultation Process can be found here: https://www.mdot.maryland.gov/OPCP/MDOT_2021_Non-Metropolitan_Area_Consultative_Process_WEB.pdf.

Once the final CTP has been developed after public input, it is submitted to the General Assembly for its approval. The final CTP is used in creating the MPO TIPs, which has all the same information. Once the final CTP and each TIP have been approved, they are brought together into the current STIP. The CTP is developed every year; however, the TIPs and the STIP are not necessarily updated every year.

To further make the transportation planning process accessible to the public, MDOT makes the MTP, the CTP, and the STIP available online for the public's information and use at http://www.mdot.maryland.gov/Planning. All MPOs also post their TIP online with other appropriate reports, studies, surveys, press releases, and pamphlets, and those can be found in Section 2.0 at the end of this document.

Both the MDOT CTP and the local government transportation budgets are updated annually and as project details change, amendments and administrative modifications are made to the relevant MPO TIPs and the STIP. This reconciles the differences between annual budget documents and federal programming documents, which are updated every one to four years. If there are technical corrections, administrative modifications, or amendments to projects located in an LRTP, TIP, or STIP, there is a memorandum of understanding (MOU), signed by FHWA, FTA, and MDOT that lists the procedures required for both MDOT and locally sponsored project changes. That MOU and the link where STIP amendments and administrative modifications are posted and tracked can be found here –

- MOU: https://www.mdot.maryland.gov/OPCP/STIP_Revised_Amendment_Procedures_2014.pdf

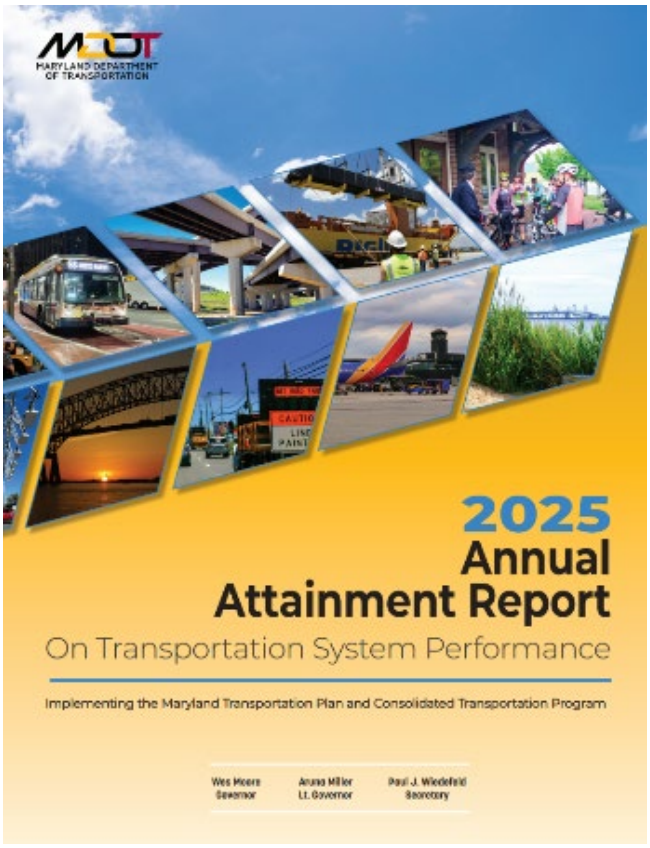

- STIP Amendments & Administrative Modifications
  https://www.mdot.maryland.gov/tso/pages/Index.aspx?PageId=192

The public participation process for this STIP and all of the Transportation Improvement Programs referenced by this document will also meet the Federal Transit Administration public participation requirements for the Maryland Transit Administration's Program of Projects.

**MDOT Planning Factors and Coordination**

**Performance Driven**

MDOT is a performance driven organization, assessing transportation system performance through data before making decisions to plan and invest. This is done through the Annual Attainment Report on Transportation System Performance (AR), the annual Managing for Results (MFR) and federal baseline performance measures.

In 2000, the Maryland General Assembly passed a bill requiring MDOT to develop the AR. The main objectives of the AR are to do the following:

- Report on progress toward achieving the goals and objectives in the MTP and the CTP; and
- Establish performance indicators that quantify achievement of these objectives; and set performance targets.

The performance measures evolve and are updated periodically in a collaborative effort between the Secretary's Office, MDOT's modal administrations, and, every 4-5 years, with an AR Advisory Committee. The performance measures were updated in 2023 using input from the AR Advisory Committee, based on the updated 2050 MTP Goals and Objectives (please visit http://www.mdot.maryland.gov/ARAC). The AR shows whether MDOT is achieving its goals and objectives based on performance indicators and helps Maryland citizens assess improvements to its transportation system.

Through this year's engagement with the AR Advisory Committee, the AR incorporates new and re-focused performance measures consistent with the Moore-Miller Administration's commitment to Leave No One Behind. As highlighted in the 2050 MTP, MDOT will be making long-term commitments to Vision Zero, pursuing zero-emission vehicle conversion, evaluating investments in underserved communities, and driving per capita reductions in vehicle-miles traveled.

To maintain the highest standards that MDOT's customers expect, MDOT must understand where it is succeeding and where extra effort is needed toward achieving critical policy goals. The AR provides the performance measure information needed to make those decisions. The annual CTP outlines where MDOT will be making investments in the coming years on the State's multi-modal transportation system. The AR demonstrates the success of those investments and where improvements can continue to be made to ensure that taxpayer dollars are having the greatest

impact in improving the lives of Marylanders.

Through coordination with MPOs and adjacent state DOTs, MDOT initiated baseline performance measures and targets for the MAP-21/FAST Act federal safety, infrastructure condition, and system performance measures. These system performance measures are described in the System Performance Report included with the 2050 MTP. MDOT will continue to work with USDOT, the regional MPOs and other stakeholders to demonstrate the effectiveness of MDOT's programs. Please see "Appendix J – National and State Performance Management Goals" for the full listing Performance Based Planning and Programming (PBPP) targets, goals, and implementation at SHA and MTA.

In 23 CFR § 450.206 (a), federal guidelines require that each state carry out a continual, cooperative, and comprehensive statewide transportation planning process that provides for the consideration and implementation of projects, strategies, and services. Some examples of how MDOT has implemented these guidelines are detailed below.

***System Preservation***

MDOT is committed to delivering a high quality, reliable and integrated multimodal transportation system. To implement this, MDOT has been working strategically to address more system preservation needs, ensuring Maryland's multimodal transportation system is safe, reliable and convenient. In 2023 and 2024, MDOT won several Maryland Quality Initiative (MdQI) awards, including the Nice/Middleton Bridge Replacement Project and the Bay Bridge Automated Lane Closure System.

Keeping Maryland's transportation system in a state of good repair is essential. Maintaining Maryland's diverse infrastructure in a state of good repair requires ongoing investment in inspection and preventive maintenance programs to keep our transportation systems operating reliably and efficiently. MDOT gathers and analyzes extensive data to make informed decisions about the best interventions that maintain performance and minimize long-term lifecycle costs. MDOT uses asset data collection, monitoring, testing, and condition analysis technologies to identify appropriate maintenance strategies across our diverse portfolio of transportation assets. Our program includes ongoing analysis of factors such as age, condition, and risk as part of our annual Consolidated Transportation Program (CTP) program funding process, and we guide investments towards areas of greatest impact and potential risk. MDOT will work strategically to address more system preservation needs; to ensure transit is reliable, safe, and convenient; equitable, and to improve project delivery.

State of good repair investments are managed through a comprehensive and integrated asset management program that guides transportation decision-making and investments. Maryland has a history of success with very few bridges in poor condition and the majority of its highway pavement in good condition. With a backlog of state of good repair needs, MDOT prioritizes key assets and structures first. MDOT commitment to improving its asset condition resulted in the FY 2024 – FY 2029 CTP investing $7.4 billion in system preservation.

***Safety and Security***

Ensuring the safety and security of Maryland residents and others who travel through and work on the State's airports, seaports and on buses, highways, and trains is vitally important. MDOT is committed to providing safe travel to all its customers and to protecting the safety of MDOT's workforce and contractors. Safety considerations are integral to all MDOT design and operational activities. In addition, threats to the security of travelers and to transportation assets have received heightened attention, and MDOT is committed to taking advantage of new technologies and cost-

effective countermeasures to reduce transportation system vulnerabilities. Each MDOT modal administration institutes both safety and security measures, with MDOT continuing to support these actions and strategies across the State transportation system.

The Maryland Strategic Highway Safety Plan (SHSP) is a Statewide, coordinated, and strategic traffic safety plan that provides the framework for reducing highway fatalities and serious injuries on all public streets and highways in Maryland. It establishes overall goals, objectives, and strategies within key emphasis areas. The 2021 – 2025 SHSP will be updated later this year to cover 2026-2030. The SHSP has incorporated the USDOT's Safe System philosophy as its underlying principle while also following the tenets of the Vision Zero initiative established by the Maryland General Assembly in 2019. With an aspirational goal of zero roadway fatalities by 2030, Vision Zero recognizes that even one fatality is too many. The SHSP interim annual targets through the life of the current SHSP are based on historical trends, providing realistic goals for the near future.

Six key safety emphasis areas have been identified, with action plans developed to improve safety and performance.

- Impaired driving
- Distracted driving
- Infrastructure
- Occupant protection
- Pedestrians and bicyclists
- Speed and aggressive driving

The SHSP provides the data-driven framework for Maryland to apply the best solutions to solving its most critical highway safety problems. The continued active involvement of various stakeholders, along with the unwavering focus on the measurable objectives set forth in the SHSP, ensures broad support throughout the five-year life of the plan, promises effective implementation of the plan, and supplies guidance to reach the ultimate goal of saving lives. The Maryland SHSP can be found here: https://zerodeathsmd.gov/wp-content/uploads/2021/01/2021_2025_MD_SHSP_FINAL.pdf.

***Environmental Stewardship and Planning***

Maryland's population continues to steadily grow, increasing over 1.5% from 6.08 million in 2020 to 6.18 million in 2023, according to the latest American Community Survey (ACS) 1-year estimate. By 2050, Maryland's population is expected to reach above seven million, over a 13% increase from 2023. The rise in population is likely to increase Vehicle Miles Traveled (VMT). Thus, Maryland is investing strategically in multimodal transportation projects to improve connectivity, reliability, safety and access to opportunities for the State's growing communities. Maryland's multimodal options are growing with the construction of the Purple Line, a 16-mile light rail corridor, the Red Line, a 14-mile east-west transit line and the Commuter Choice Maryland program, which promotes alternatives to driving.

Maryland's nationally significant multimodal network relies on highways, railroads, transit lines, airports, and ports. Maryland serves as a crossroad of freight activity for the entire Eastern Seaboard. The large regional rail network also supports passenger rail trips both within and out of Maryland on MARC, Amtrak and other transit systems. To increase the accessibility of the transit system and improve access to work, housing, and other activities, MDOT is investing in Transit Oriented Development (TOD). TOD will not only create better transportation choices, but also support environmental protection by promoting active transportation, reducing the demand of personal vehicles and bringing down greenhouse gas (GHG) emissions.

Greenhouse gas (GHG) emissions are not included in the sections of the Clean Air Act (CAA) governing the transportation planning and conformity processes; however, the State's commitments to reduce GHG emissions are guided by State legislation. The State's Greenhouse Gases Reduction Act (GGRA) was reauthorized in 2016 and established the greenhouse gas (GHG) reduction goal of 40 percent from 2006 levels by 2030 ("40 by 30"). Maryland's 2030 GGRA Plan, completed in 2021, addressed the suite of actions necessary to meet the 40 by 30 GHG reduction goal. Through the MDOT GGRA Plan (which is a component of the Maryland 2030 GGRA Plan), MDOT aligned its mission and transportation planning efforts to mitigate GHG emissions while investing in a resilient and sustainable transportation. Meeting the transportation sector emissions reduction challenges and opportunities requires innovative infrastructure design, investment in travel choice and travel efficiency, and adoption of fuel and vehicle technologies that consume less fossil fuel.

In 2022, the Maryland Climate Solutions Now Act (CSNA) was passed, committing Maryland to a nation-leading interim goal of a 60% reduction below 2006 carbon emissions by 2031, progressing to a requirement to reach net-zero emissions by 2045. At the end of 2023, MDOT released its Climate Pollution Reduction Plan (CPRP), which lays a framework for the department to support the State's achievement of its carbon reduction goals identified in the CSNA. In November of 2024, MDOT submitted the agencies first Climate Implementation Plan (CIP), in response to the June 2024 Executive Order by Governor Wes Moore. The CIP identifies specific strategies to advance the agencies CPRP and aligns efforts across a range of MDOT and State plans.

MDOT is using federal funding to advance carbon reduction projects that further progress on state and agency goals and priorities. MDOT launched the Climate Focused Funding Portal in 2024, which allows applicants to submit projects that reduce surface transportation emissions. Funding for these projects comes from the $55 million in funding Maryland is via the federal Carbon Reduction Program (CRP) established through IIJA.

MDOT has implemented a variety of transportation emissions reduction strategies, adopting policy and program changes, that collectively improve air quality, reduce congestion and reduce emissions. Through its leadership of the Zero Emission Electric Vehicle Infrastructure Council (ZEEVIC), MDOT plays a leading role in the deployment of Electric Vehicle (EV) infrastructure, supporting growth in zero-emission vehicles (ZEVs) in Maryland. Reducing congestion is a critical component of mitigating GHG emissions and MDOT continues to expand transit services, improve travel demand management programs. MDOT has also developed Maryland's Connected and Autonomous Vehicle (CAV) Strategic Vision and MDOT's CAV Strategic Plan and is deploying integrated corridor management advances to manage congestion.

Furthermore, MDOT, along with the Maryland Department of the Environment (MDE), were awarded $130 million in Climate Pollution Reduction Grants in 2024 that will go towards infrastructure for zero-emission medium- and heavy-duty vehicles along the I-95 corridor in the State.

***Coordinated Public Transit - Human Services Transportation Plan***

"On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act," which maintained the changes implemented in the Moving Ahead for Progress in the 21st Century Act (MAP-21). The MAP-21 legislation introduced several program changes, including the repeal of the Section 5316 and 5317 programs and the establishment of an enhanced Section 5310 program. This program serves as a single formula-based initiative to support the mobility of seniors and individuals with disabilities.

The Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users

(SAFETEA-LU), the predecessor to MAP-21, required that projects funded through the Federal Transit Administration's (FTA) Section 5310 (Elderly Individuals and Individuals with Disabilities), Section 5316 (Job Access and Reverse Commute – JARC), and Section 5317 (New Freedom) programs "must be derived from a locally developed, coordinated public transit-human services transportation plan." This requirement continues under MAP-21 and the FAST Act for projects funded through FTA's Section 5310 (Enhanced Mobility of Seniors and Individuals with Disabilities). The goal of this provision is to improve transportation services for individuals with disabilities, older adults, and individuals with lower incomes while ensuring communities coordinate transportation resources across multiple federal programs.

The Maryland Transit Administration (MTA) led the development of the initial Statewide plan and five regional Coordinated Transportation Plans in October 2007. These plans were subsequently updated in 2010, 2015, and 2019, with all versions being adopted by appropriate local bodies. These planning efforts address not only Section 5310 but also the broad spectrum of services provided by Maryland's locally operated transit systems and local human service providers. The Coordinated Transportation Plans assess the transportation needs of older adults, people with disabilities, and low-income workers, identify gaps in service, develop strategies to improve efficiency, and prioritize specific initiatives for implementation. Additionally, the plans outline potential organizations or structures that could support coordinated activities and the development of new coordinated services. The next update to these plans is scheduled for 2025.

In October 1997, the Governor established the State Coordinating Committee for Human Services Transportation (Executive Order 01.01.1997.06). The Committee was reconstituted in September 2006 and again in April 2010 (Executive Order 01.01.2006.09; Executive Order 01.01.2010.10). In October 2023, the General Assembly formally authorized the Committee through statute and renamed it the State Coordinating Committee for Health and Human Services Transportation (Chapters 331 & 332, Acts of 2023; Code Transportation Article, sec. 7-1109).

The Committee is responsible for assessing and planning for the transportation needs of older adults, individuals with disabilities, and those requiring affordable, accessible transportation to access employment, job training, and educational programs.

To ensure Maryland residents continue to have access to education, health care, employment, senior activities, and training, the Committee prepares a five-year plan for human services transportation. Additionally, the Committee coordinates efforts and resources among federal, State, and local agencies, serves as a clearinghouse for transportation-related issues, and evaluates the need for vehicle and driver standards. The Committee also participates in planning the allocation of human services transportation resources for emergency evacuations.

As part of its ongoing efforts to enhance transportation services, in 2024, a specialized working group was established to analyze current strategies and deliverables. This group is responsible for evaluating the effectiveness of existing initiatives and providing recommendations to improve coordination, efficiency, and service delivery. Their findings will help inform future planning efforts and ensure that Maryland's transportation programs continue to meet the evolving needs of residents.".

## ■ 5.0 Linking the STIP to Federal Regulations and Transportation Authorizations

This section contains additional information about the development and content of Maryland's STIP to demonstrate compliance with federal requirements. The following information is organized according to 23 CFR § 450.218 subsections (a) – (m). Previous federal authorizations, including MAP-21 and the FAST Act made a number of reforms to the metropolitan and statewide transportation planning processes, including incorporating performance goals, measures, and targets into the process of identifying needed transportation improvements and project selection, as well as provisions to support and enhance these reforms.

**(a) Federal STIP Update Guidelines:** MDOT intends to update its STIP every three years. The federal regulations only require an update every four years.

**(b) MPO Coordination and Air Quality Attainment:** There are six metropolitan planning organizations (MPOs) across the State that perform a range of activities that promote an integrated approach to regional transportation planning. The federally mandated transportation planning process requires MPOs to produce a financially constrained long- range multimodal transportation plan (LRTP) and transportation improvement program (TIP) that lists actual funding commitments for projects. MPOs must follow their approved Public Involvement and Title VI Plans to solicit public concerns and ensure the transportation plans do not disproportionately affect individuals from discrimination in transportation programs and activities receiving federal financial assistance, specifically based on race, color, and national origin. The MPO Board, consisting of local elected officials, transit agencies, and State and local transportation representatives, is the approving authority for the MPO. Once the plans and programs are approved, they are added to the STIP.

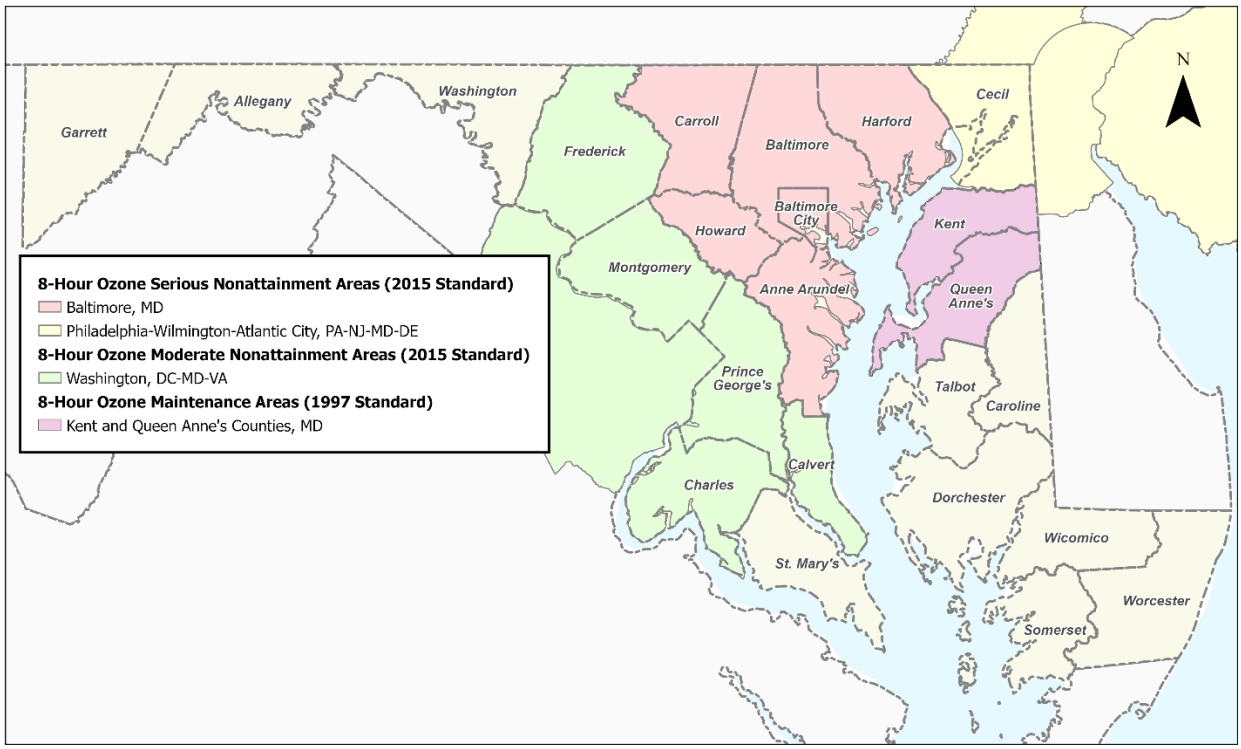

In addition, the MPOs must ensure that the projects included in the LRTP and TIP collectively contribute to air quality improvement goals for the region. This requirement is the federally regulated transportation conformity process that requires nonattainment and maintenance areas to demonstrate that all future transportation projects will not hinder the area from reaching and maintaining its attainment goals and will not:

- *Cause or contribute to new air quality violations,*
- *Worsen existing violations or*
- *Delay timely attainment of the relevant National Ambient Air Quality Standards (NAAQS).*

Regional transportation conformity is required for areas designated nonattainment and maintenance of the National Ambient Air Quality Standards (NAAQS). To demonstrate conformity, the regional emissions associated with the LRTP and TIP must be less than or equal to the motor vehicle emissions budgets (MVEB) established in a State Implementation Plan (SIP).

In Maryland, transportation conformity is applicable in the ozone nonattainment and maintenance areas, illustrated in the figure below.

**Figure 5.1 Ozone Nonattainment and Maintenance Areas**

*Ozone*

The current ozone NAAQS is the 70 parts per billion (ppb) 8-hour standard established in 2015. The US EPA designated three areas in Maryland in non-attainment. These areas are subject to transportation conformity. The Metropolitan Washington, DC, (DC-MD-VA) region was reclassified to "moderate" non-attainment in 2023, because it failed to demonstrate attainment by 2020. The region has been meeting the standard since 2021, and in 2025 a Redesignation Request and Maintenance Plan are being prepared to redesignate the region to attainment.

The Baltimore, MD region and Cecil County as part of the Philadelphia-Wilmington-Atlantic City (PA-NJ-MD- DE) region were classified as in "serious" non-attainment on July 30, 2024, which requires the areas to demonstrate attainment by August 2027.

Kent and Queen Anne's Counties are "maintenance" areas for the 1997 ozone standard. For transportation conformity, they are considered an isolated rural area and require conformity only for new, regionally significant projects. All other counties in Maryland are in attainment for ozone.

*PM2.5*

The US EPA published a revocation of 1997 particulate matter (PM2.5) Standard in 2016, resulting in three areas in Maryland, previously designated as maintenance areas, no longer being required to demonstrate transportation conformity for any fine particulate matter standard. These areas include the Washington, DC and Baltimore regions, as well as the Hagerstown-Martinsburg, WV region. All counties in Maryland are in attainment of the 2006 and 2012 PM2.5 NAAQS.

In 2023, the EPA announced the reconsideration of the PM2.5 standards and made a final announcement in early 2024 stating that the primary annual standard for PM2.5 will be lowered by 25% from 12 µg/m$^3$ (micrograms per cubic meter) to 9 µg/m$^3$. The PM2.5 reductions from Maryland regulations were so successful that Maryland is already meeting the more stringent standard.

**(c) Non-Metropolitan Area Coordination:** Development of the STIP is not complete until the needs and priorities of non-metropolitan areas are included. MDOT has developed the "Non-metropolitan Area Consultative Process" in order to comply with federal transportation planning requirements. This policy provides a process for non-metropolitan areas and non-metropolitan elected officials to be involved in Statewide transportation planning that spans across all modes. Section 4.0 also described the annual CTP/STIP Fall Tour, a key component of Maryland's outreach to non-metropolitan areas and other coordination efforts with non-metropolitan areas pursued by MDOT.

**(d) Indian Tribal Government Coordination:** There are no federal Indian Tribal governments in the State of Maryland.

**(e) Federal Lands Highway Program (FLHP) TIP:** The STIP includes all FLHP projects that have been approved by FHWA without modification (see Appendix E).

**(f) Public Comment and Title VI**: The STIP is developed within an inclusive, accessible, and responsive public involvement process. As mentioned under "(b) MPO Coordination and Air Quality Attainment," each TIP is subject to its own public comment process and review period. Several public outreach attributes of the STIP development process (e.g., CTP Fall Tour) were described in Section 4.0.

MDOT recognizes that an early and continuous public participation process is the key to keeping the public fully informed and involved in making decisions that affect Maryland's transportation systems. MDOT strives to be as inclusive as possible and employs a range of public outreach strategies that vary based on the relevant outreach needs. MDOT takes an inclusive attitude to engaging the public by targeting all populations not solely Title VI and Limited English Proficiency populations. These strategies have included press releases, mass mailings, interviews, facilitated meetings, an interactive website, newsletters, social media, and online surveys.

MDOT's public participation process begins during the development of MDOT's Statewide Transportation Plan, called the Maryland Transportation Plan (MTP), continues through the creation of Maryland's Statewide Transportation Improvement Program (STIP) and six-year Consolidated Transportation Program (CTP), and finishes with the project development phase for implementation of specific transportation system improvements. The MDOT Annual Consultation Meetings Tour (the Fall Tour) is the major outreach activity of MDOT for the development of the MTP, STIP, and CTP.

As part of the MDOT Tour, the Secretary and MDOT modal administration leaders meet with the public and discuss ways to improve transportation in the State. Annually, there are at least twenty-four public MDOT Tour meetings held across the State. These meetings are hosted by local jurisdictions and held at different local venues, including county buildings, community centers, local boards of education, and public libraries that are transit accessible locations with variable starting times to accommodate varying work schedules.

The MDOT's public outreach included providing notice of the MDOT Tour meetings through press releases, mass mailings, social media, and MDOT website postings. To encourage participation by minority and Limited English Proficiency populations throughout Maryland, prior to public meetings, MDOT will place advertisements in local newspapers, including major and non-English language media, to inform the public of these activities. MDOT will also use, when appropriate, non-English language newspapers within the local jurisdictions that public outreach is being conducted. MDOT will continue to issue press releases, send mass mailings, use surveys, and post on the MDOT social media pages and the MDOT website. MDOT will continue to work with the local jurisdictions to ensure that public meetings continue to be held at transit accessible locations with varied start times to accommodate as best as possible varying work schedules and continue to work with the local jurisdictions to engage minority and Limited English Proficiency populations.

📖 A draft of the Statewide Transportation Improvement Program was released today. This program compiles state, local & regional highway and transit projects that are federally funded and planned for study/construction over the next 4 years.

👊 The public can comment on proposed plans by emailing MDOTRegionalPlanning@mdot.maryland.gov, or sending a letter addressed to STIP Comments, Office of Planning, Programming and Project Delivery, Maryland Department of Transportation, 7201 Corporate Center Drive, Hanover, Maryland 21076.

➡️ The public comment period will be open through April 4, 2025.

Read the draft: https://ow.ly/LGLR50VcROW

**(g) Capital and Non-Capital Project for Specific Federal Funds:** The STIP includes all projects using federal funds for capital and non-capital projects. An example would be the list of bicycle and pedestrian projects programmed that can be found in Appendix L. In addition, MDOT tracks a set of bicycle and pedestrian performance measures identified in the Maryland Bicycle and Pedestrian Master Plan and will continue to document progress in the AR.

**(h) Regionally Significant Projects:** The 2025 STIP includes all MDOT projects, including those projects of regional significance. For conformity purposes, all MPO TIPs contain all projects of regional significance as well, regardless of funding source.

**(i) Project / Phase Summary Reports:** For each major project to be included in the CTP, MDOT either creates a summary Project Information Form (PIF), which is a summary of information for each project or submit the projects through the MPO TIP process. Important data is included on the PIFs and the TIP project sheets, such as a map illustrating the location and size of a project, an image illustrating the type of project, project justification, other non- Federal funding sources, and Smart Growth Status. The Chapter 725/Chapter 30 prioritization process also requires that for projects in the Construction Program, the appropriate State Goals from the State Transportation Plan (MTP) be identified. Each MPO TIP explains how to read the TIP project sheets. The Rural/Statewide federal funding sources and federal-aid phase descriptions can be found in Appendix F.

**(j) Grouped Projects:** In the STIP, 23 CFR 450.326(h) permits MDOT to group projects "that are not considered to be of appropriate scale for individual identification." These projects, typically referred to as "minor" or "system preservation" appear in MDOT's various system preservation programs, are smaller in scope and cost, and can include both smaller new construction, including safety improvements, and ongoing maintenance activities such as roadway resurfacing. These system preservation program projects in metropolitan areas are grouped based on MDOT SHA funding categories (see Appendix F). "Major" and/or regionally significant projects are not grouped together, and each has its own project information form (PIF) page in the STIP. In select instances, individual system preservation projects may be determined to be regionally significant, and each also will have its own PIF page in the STIP.

**(k) Consistency with State Long-Range Transportation Plan and MPO Long-Range Transportation Plans:** The multimodal goals and objectives in the *2050 Maryland Transportation Plan (MTP)* provided policy guidance for the FY2025-FY2028 STIP development. The MTP in turn provides overall policy direction for Maryland's six MPO LRTPs which in turn provide overall policy direction for development of the TIPs.

**(l) Financial Plan:** The financial documentation can be found in Appendix B & C and in the CTP Summary. This information was presented and distributed to the public during the 2023 Fall Tour. The section titled "Where the Money Comes From," found in the executive summary of the CTP details the various inputs to the TTF, which is Maryland's dedicated transportation revenue source. As Figure 3.1 illustrates, the TTF is supported by federal aid, operating revenues, user fees, motor fuel taxes, vehicle titling taxes, registration fees, sales and use taxes, corporate income taxes, and bond proceeds. This source of funding is available to pay for operating, maintenance, and capital costs (including system preservation) associated with highways, transit, aviation, motor vehicle administration, and the Port of Baltimore.

The CTP contains all capital projects funded with the TTF. The TTF assures there are no administrative barriers to combining or flexing State or federal transportation funds to pay for the needs of a given project, within the constraints of statutory authority. Additionally, because transportation needs are not paid for using the State's general fund, transportation does not have to compete with other State programs and expenditures for funding.

The total projected State-sourced revenues, federal aid, and bond issuances amount to $36.7 billion for the six-year period covered by the FY 2024 – FY 2029 CTP to support MDOT's operating, capital, and debt payment expenses. In addition, 5 percent of the Highway User Revenues credited to the TTF are shared with Maryland's counties and Baltimore City to support their local transportation needs. The Department maintains a six-year Financial Plan that is updated semi-annually. User revenues are payments made by our customers for transportation infrastructure and services; and as such, their long-term growth follows the trend in State population.

This STIP reflects the financial realities of the global pandemic and the significant loss of all sources of funds except federal funds. While federal funds increased with the three relief packages the State funds to match formula funds dramatically decreased. To continue with the program of projects MDOT had to use toll credits and shift federal funds to previously State funded projects wherever it was possible. As indicated by FHWA, "A State may earn toll credits when a toll authority uses toll revenues to build, improve, or maintain highways, bridges, or tunnels that serve the public purpose of interstate commerce. Once toll credits are earned and approved by FHWA, such toll credits can be applied towards the non-Federal share requirement for eligible projects." In Maryland, toll credits are generated through the Maryland Transportation Authority, which operates the tolled facilities in the State. The State Highway Administration uses these credits to lower the state funding share required to advance critical projects, with a focus on safety, state of good repair, and economic development. This STIP's financial plan reflects the continuation of most of the previous projects but with a much greater reliance on federal funds and toll credits on previously State funded projects and federal projects that were 80/20 split funded.

MDTA is independently funded through tolls, concessions, investment income, revenue bonds, and miscellaneous sources; thus, its funding sources are separate from both the TTF and the State's General Fund. While there is no federal funding associated with any of the MDTA projects, the projects that MDTA constructs that are considered "Regionally Significant" can be found in the appropriate Metropolitan TIP. Please reference the various TIPs for the project information such as I-95 projects included in the BRTB TIP.

Another source of funding that is accounted for in the STIP includes local Congressional earmarks. Local earmarks can be found in the Minor Projects section of the SHA County PIF pages.

The revenue and cost estimates for the CTP/STIP use an inflation rate to reflect "year of expenditure dollars" based on reasonable financial principles and information developed cooperatively by the State, MPOs, and public transportation operators. The CTP describes the economic trends and assumptions that were used to estimate MDOT's revenue and operating cost projections. The CTP also describes the assumptions used to estimate federal aid for highways, transit, WMATA, and aviation.

**(m) Fiscal Constraint:** Fiscal constraint is a requirement that dates back to the Intermodal Surface Transportation Efficiency Act of 1991. The purpose of fiscal constraint is to ensure that states have adequate funding available to implement projects identified in the STIP while also providing for the operation and maintenance of the existing transportation system. The 2025 STIP is financially constrained by revenues that are reasonably expected to be

available through the four-year funding period of the STIP or project completion using year of expenditure dollars. The revenue and expenditure projections use the latest available economic estimates from two national forecasting companies.

The Department publishes its six-year financial plan at least twice per year in conjunction with the publication of the draft CTP and the final CTP to demonstrate the affordability of the capital program. For internal planning purposes, additional financial plans are developed throughout the year to reflect year-to- date revenue attainment and spending, alternative planning horizons, or sensitivity testing. The financial plan accounts for all the Department's revenues, planned expenses, debt service, and the issuance of bonds to help fund the capital program. Revenue forecasts are based on historical attainment, econometric modeling, independent forecasts of certain variables, and a consensus process with the State's Board of Revenue Estimates and legislative staff. The MDOT capital program budget process is based on a projection of available State funding versus anticipated available federal funding. The most recent financial forecast made for the development of the MPO's LRTPs, TIPs, and the FY 2025 – 2028 STIP was in 2022. Future projections of state funds use a historical annual average growth rate of 5.0%. Federal fund projections for the same period are based on an average growth rate of 3.0% for highway and 2.33% for transit program funds. The Maryland General Assembly's recent legislative revenue increase, addressing Maryland's funding shortfall, will be reflected in the assumptions and methodology of future Financial Forecasts, CTPs, LRTPs, TIPs, and STIPs.

Several specific requirements apply to the federal definition of fiscal constraint. They include:

- A STIP must be financially constrained by year and funding category.
- The STIP must clearly identify projects to be funded using current revenues and which projects are to be funded using proposed revenue sources.
- Proposed funding sources and strategies ensuring their availability shall be identified.
- Operation and maintenance funding must be programmed into the STIP.
- The State must have a process for estimating expected revenue from all funding sources over the time period of the STIP and furnish this information to MPOs for the development of their TIPs.

The 2025 STIP demonstrates fiscal constraint in the following ways. The CTP and TIPs specify funding sources (Federal, State special, State general, other) to be used for projects broken down by year and project phase (planning, engineering, right-of-way, and construction). Projects (or phases of projects) are listed only if full funding is anticipated to be available for the project (or appropriate project phase) within the time period established for its completion. The "MDOT Capital & Operating Program Summary" includes Operating and Maintenance Costs, which are fully funded first before any funding is declared available for Capital projects. Lastly, all of the information contained in the MPO TIPs for the State projects comes directly from the CTP. Once the CTP is approved by the Maryland General Assembly and Governor, it becomes the budget established in the financial system.

**State Highway Administration Details**

The STIP primarily is a planning document, including a snapshot of revenue and expenditure information, projected over four years, at the time of adoption. This stands in contrast to a budget document, which would communicate day-to-day expenditures, approvals, and federal reimbursements. However, due to increasing scrutiny concerning the demonstration of fiscal constraint, a discussion of MDOT SHA's day-to-day budget process is relevant.

As described in the executive summary, the MDOT capital program is funded by State funds (dedicated Transportation Trust Fund revenues and CTP bond funds) and federal funds.

SHA primarily receives federal funds from FHWA under a federal transportation funding authorization. SHA reviews each project to determine its eligibility to use federal-aid funds. Subsequently, FHWA must authorize the obligation of federal funds in advance of SHA seeking federal reimbursement of project costs. If federal eligibility criteria cannot be met, State funds must be programmed, if available, instead.

It is important to note that the federal surface transportation program primarily has been a capital construction program and rarely are federal funds authorized for maintenance projects or activities. At this time, only Coordinated Highways Action Response Team (CHART) operations activities receive federal funds as part of the maintenance program. The other exception is Federal Emergency Management Agency (FEMA) and FHWA Emergency Relief funds, which may be sought when a significant or catastrophic emergency weather event occurs and causes significant damage. It is important to capture the costs associated with these events in order to seek federal reimbursement. It should be noted that the use of federal funds for preliminary engineering and final design must be evaluated carefully given FHWA payback rules. Should a project not proceed to right-of-way acquisition or construction within 10 years, preliminary engineering and/or final design costs previously reimbursed with federal funds may need to be paid back.

**Maryland Transit Administration Details**

As described in the executive summary, the MDOT capital program is funded by State funds (dedicated Transportation Trust Fund revenues and CTP bond funds) and federal funds. MTA primarily receives federal funds from FTA under a federal transportation funding authorization. MTA reviews each project to determine its eligibility to use federal-aid funds. The projects are then applied for by the type of federal funds being used. For the formula funds, each grant usually has multiple projects on it.

**Capital Project**

A capital project included in the STIP generally is a project that ultimately results in the construction of an infrastructure asset or improves the infrastructure asset by extending its useful life. The CTP development process comply with Accounting Pronouncement GASB-34, which requires infrastructure and all capital assets be accounted for and depreciated based on the reasonable useful life of the asset. MDOT CTP Bonds are backed by these infrastructure assets. These bonds require that capital program bond funds be used exclusively for appropriate capital program spending as authorized by the approved CTP. Each capital project must support the specific SHA capital program fund category from which it is funded, such as Fund 77 (Resurfacing and Rehabilitation). Each capital program fund must be used exclusively for the purposes approved by the Secretary and the Legislature.

**Capital Program Fund Categories (Grouped Projects)**

Capital program funds, such as Fund 80 (Bridge Replacement and Rehabilitation), are an integral part of managing SHA's capital program. Fund categories are approved by the administrator and the secretary during the budget submission process. Each fund category represents a capital investment in the SHA network. Funds can be spent on only capital projects within the SHA network unless the project has been approved as reimbursable by another party, i.e., a local jurisdiction. Work performed in the capital program cannot be considered repair or maintenance work, which is work that does not extend the useful life of a capital or infrastructure asset, but rather minimally extends the asset's life. Repairs to and maintenance of the SHA network must be approved and charged against the maintenance program. (See Appendix F for more information on Federal Funding Sources)

**Form 42 and Form 30 – Project/Contract Approval Process**
The SHA capital project approval process is facilitated through the use of MDOT SHA Form 42 and MDOT SHA Form 30. These forms must be approved before capital funding can be authorized, committed, and/or expended. The Form 42 allows a project to be authorized for future funding from an approved capital fund category. One requirement of the Form 42 is that it must contain the appropriate TIP and/or STIP reference for the project. MDOT SHA Federal Aid Programming assesses the project's federal funding eligibility at that time. Accurately assessing eligibility is important as an erroneous determination can lead to potential under-spending of federal funding and over-spending of State funding.

Approval of a Form 42 requesting construction funding signifies that the project can proceed to advertisement. The approved Form 42 commits the future funds under the appropriate capital program fund category, but it also allows the cash flow and forecasting process to begin. Subsequently, a Form 30 must be submitted to establish an active project number in FMIS, except in the case of advertised construction projects. It should be noted that any change in project cost, schedule, and/or scope is documented through the Form 42 and Form 30 process. This change approval step allows a project to be authorized for any changes that result in a decrease or increase of spending of State or federal dollars, as well as any significant changes in cash flow assumptions.

**Advertisement Schedule**
The SHA advertisement schedule is a working document reviewed weekly by SHA senior management and capital program fund managers that ensures all approved capital construction projects proceed to contract advertisement on schedule. FHWA also regularly participates in the weekly review. Only projects with an approved Form 42 can be included in the advertisement schedule. The review process ensures major milestones are achieved by meeting targeted dates including the project's notice to proceed date, on which the project's cash flow estimate and budget are based.

**Monthly Forecast**
The SHA monthly financial forecast allows MDOT SHA management to monitor capital program spending levels via the *budgetary* process (not the *planning* process). Each fund category within the approved CTP is monitored to ensure that project spending/programming is progressing within the estimated cash flow/approved budget or to determine if it is under- or overspending/programming. Immediate action must be taken to correct any significant spending issues. Generally, capital program spending is considered to have been successful if, at the end of a fiscal year, at least 90 percent of the programmed budget is spent, and State funding is not overspent.

**Advance Construction**
The SHA uses Advance Construction (AC) procedures to manage its capital program. In general, all projects are placed in AC when advertised for construction. Conversion to regular federal funding occurs consistent with the cash flow required during each fiscal year. The cash flows used are the same as those carried in MDOT's CTP. Federally-funded projects are added to the program only when there is sufficient obligation authority (OA) remaining after providing for projects already underway. For planning purposes, the OA is calculated at a rate of 90.1-94.0 percent of authorized appropriations. A detailed analysis of the use of OA is prepared for CTP each year.

Additionally, MDOT SHA has utilized toll credits to manage the funding of highway improvements. Toll credits for non-federal share are a provision in United States Code that allow states to take a credit for documented non-federal expenditures by a state toll authority on routes that carry interstate commerce. The credit takes the form of replacing the federal matching share, i.e. the State share, making a project (or at least the federal-aid eligible

portions of a project) 100 percent federally funded. Toll credits do not give a state any more federal aid to spend; toll credits only allow a state to use federal funds in lieu of the State match portion, which provides flexibility to better manage the use of State and federal funds. The STIP also includes fiscal constraint summary tables and explanation worksheets for MDOT SHA and for Statewide projects (see Appendix B and Appendix C).

## APPENDIX A – Statement of Self Certification

As MDOT oversees its modal agencies, there is close coordination in all aspects of project delivery. MDOT is in the possession of or is currently compiling the following Plans, Certifications and Assurances from all processes in relation to each federal requirement, including but not limited to the following:

- Assurances
- Title VI Plan
- LEP Plan
- Self-Evaluations
- Transition Plan
- Public Involvement Guidelines
- Memorandums of Understanding with MPOs
- Reviews of MPOs conducted by SHA/MTA
- Reviews conducted by Federal oversight agencies of MPOs (SHA/MTA)
- MPO Public Involvement Plans (Office of Planning, Programming, & Project Delivery)

If you have any questions or need additional information, please do not hesitate to contact Kari Snyder, Regional Planner, Office of Planning, Programming, & Project Delivery at 410-865-1305, toll-free at 888-713-1414 or via email at ksnyder3@mdot.maryland.gov.

## STATEWIDE TRANSPORTATION PLANNING PROCESS SELF-CERTIFICATION

The Maryland Department of Transportation hereby certifies that its Statewide transportation planning process is addressing major issues facing the State and its non-urbanized areas, and is being carried out in accordance with the following requirements:

I. 23 U.S.C. 134, 135 and 23 CFR 450 subparts A, B, and C; and 49 U.S.C. Section 5303 and 5304;
II. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1), the Title VI Assurance executed by each state under 23 U.S.C. 324 and 29 U.S.C. 794, and 49 CFR part 21;
III. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
IV. Section 1101(b) of the Fixing America's Surface Transportation Act: Legacy for Users (Pub. L. 114-357) and 49 CFR Part 26 regarding the involvement of Disadvantaged Business Enterprises in USDOT funded planning projects.;
V. 23 CFR part 230, regarding implementation of an equal employment opportunity program on Federal and Federal-aid Highway construction contracts;
VI. The provisions of the Americans With Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR part 27, 37 and 38;
VII. Sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93. (Note-only for states with non-attainment and /or maintenance areas outside metropolitan planning area boundaries).
VIII. The Older Americans Act, as amended (42 U.S.C. part 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
IX. 23 U.S.C 324, regarding prohibition of discrimination on the basis of gender;
X. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities; and

## Explanation of Fiscal Constraint Worksheet – MDOT SHA

### MDOT SHA Revenue Available

- **Balance Carried Forward** - This line is the balance carried forward from the preceding year.
- **Federal Fund Balance as of 10/01/2023** – This is the sum of federal formula funds anticipated to be carried forward in federal FMIS as of 10/01/2023.
- **Federal Core Apportioned Programs w/o HPP** – The federal apportionment amounts are taken directly from IIJA Act Apportionment Tables, FY 24-26; assume FY 26 inflated 2% per years after Act. Total w/NHPP Exempt.
- **Federal High Priority Project Funding** - No IIJA Specific Earmark, therefore, no allocations have been assumed in this fiscal constraint analysis.
- **Deobligations Unused Prior Year Projects at Closure** - SHA Federal Aid Analysis used Sept 2023 Assumptions
- **Special Federal Appropriations and Allocations** – This line is for special federal discretionary allocations received in addition to apportioned federal funds like COVID19/ARPA, none assumed.
- **Allocation from MDOT for SHA Capital Projects** – This line represents the approved allocation from MDOT for the non-federal share of SHA capital program project expenditures. This amount corresponds to “Special Funds” on the SHA Capital Program Summary on page 41 of this document.

**MDOT SHA Revenue Uses**

- **Major Projects (includes D&E)** – This line is the total for major projects and matches the sum of "Construction Program" plus "Development and Evaluation Program" as shown in the Capital Program Summary page 27.
- **Safety, Congestion Relief and Community Enhancement** – The listings under this heading are annual allocations (budgets) for core system preservation initiatives, and the total matches that shown for "Safety, Congestion Relief and Community Enhancements" as shown in the Capital Program Summary page 27.

    - **Environmental Preservation** – This fund provides for design and construction of roadside landscape features, reforestation plantings, critical area mitigation, wetland and stream permitting and mitigation, and other environmental restoration/ preservation efforts associated with Capital Program delivery.
    - **Crash Prevention** – This fund includes roundabouts, minor geometric improvements, capital remedial improvements, and general corridor improvements.
    - **Median Guardrail and End Treatment** – This fund includes traffic barrier improvements.
    - **ADA Retrofit** – This fund includes sidewalks, crosswalks, and ramp retrofit improvements to address compliance and avoid sanctions.
    - **Railroad Safety and Spot** – This fund includes safety improvements at railroad crossings.
    - **Drainage** – This fund includes improvements to areas of recurring flood damage or road closures.
    - **Emergency** – This fund includes work performed as a result of major storm damage, slope failures, or other unforeseen roadway or bridge emergencies.
    - **Safety and Spot Improvements** – This fund includes safety improvements at high accident locations, intersection capacity improvements, slide repairs, roundabouts, and ramp modifications.
    - **Resurfacing and Rehabilitation** – This fund includes resurfacing improvements, including concrete patching, joint sealing, and pavement markings.
    - **Sidewalks** – This fund includes the construction of retrofit sidewalks along State highways and the reconstruction/replacement of existing sidewalks if part of a revitalization effort in an officially designated urban revitalization area.
    - **Bridge Replace and Rehab** – This fund includes bridge replacements, deck replacement, major rehabilitations, deck overlays, parapet modifications, bridge repainting/spot painting, and all structure condition inspections.
    - **Park-and-Ride** – This fund includes park and ride lot expansions, repairs, and lighting and can include construction of truck parking spaces at park and ride facilities and welcome centers.
    - **Urban Reconstruction** – This fund includes the rehabilitation of roads through urban areas including pavement and drainage reconstruction.
    - **Traffic Management** – This fund includes new signals, signal system construction, signal reconstruction, raised pavement markers, lighting, and signage.
    - **CHART (ITS Program)** – This fund includes installation of advanced traffic management systems (ATMS) and advanced traffic information system (ATIS) technologies on interstates and arterials Statewide.
    - **Intersection Capacity** – This fund includes geometric improvements to improve

mobility at congested intersections.

- **Bicycle Retrofit** – This fund includes construction and reconstruction of roadway shoulders, road markings for bicycles, fixing potholes, and construction of off-road trails parallel to existing roadways.
- **TMDL Compliance** – This fund includes planning, designing, and construction of stormwater controls and alternative water quality improvement strategies in Maryland Phase I and Phase II counties to meet US Environmental Protection Agency's Chesapeake Bay TMDL requirements by 2025.
- **Retrofit Sound Barriers** – This fund includes retrofits to sound barriers along existing highways, barrier rehabilitation, and noise berms.
- **General SPP** – This fund is a General System Preservation Program.

- **Other System Preservation** - The total matches that shown for "Other System Preservation" and "Reimbursables" as shown on the SHA divider page in the CTP.
- **Subtotal of SHA Uses** – This line represents the total anticipated SHA expenditures (both federal and State dollars). The annual totals match that shown as "TOTAL" on the SHA divider page in the CTP.
- **GARVEE Debt Service** – This line is a reservation of federal funds for federal eligible expenses for the major projects which are partially funded with GARVEE bonds.
- **Competitive Grants** – Competitive grant projects are represented as stand alone projects in both the TIPs and the STIP with federal funding sources clearly indicated.
- **Other** – Funding reservations under this heading include the use of federal highway funds for initiatives external to the SHA. This includes the reservation of federal funds for expenditures on: ADHS local access improvements in accordance with Appalachian Regional Commission policies; local bridge rehabilitation and replacement projects; Baltimore City projects including high priority projects that have received federal funding; local (non-SHA and non-Baltimore City) high priority projects that have received federal funding; grants for recreational trail projects; grants for Safe Routes to Schools projects; and for the flexing of CMAQ funds for transit/non-SHA CMAQ eligible projects.

### Bridge Formula Program

Title VIII of Division J of the Infrastructure Investment and Jobs Act (IIJA), Public Law (Pub. L.) 117-58, appropriated $9,454,400,000 from the General Fund for Highway Infrastructure Programs (HIP) for Fiscal Year (FY) 2025. Of such amount, $5,500,000,000 shall be set aside for a bridge replacement, rehabilitation, preservation, protection, and construction program (hereafter, Bridge Formula Program (BFP)).

While the funds are labeled as the Bridge Formula Program, they are exempt dollars that are apportioned but do not draw down from the MDOT SHA obligation limitation. There is a 15% set-aside of these funds for off-system bridges specifically, which primarily goes to local public agencies.

## APPENDIX F – Federal Funding Sources

### Federal-aid Highway Funding

1. **Appalachian Development Highway System (ADHS)** – The Appalachian Development Highway System Program continues funding for the construction of the Appalachian corridor highways in 13 states to promote economic development and to establish a State- Federal framework to meet the needs of the region.
2. **Congestion Mitigation and Air Quality (CMAQ)** – The Congestion Mitigation and Air Quality Improvement Program provides funding for projects and programs in air quality nonattainment and maintenance areas for ozone, carbon monoxide (CO), and particulate matter (PM-10, PM-2.5) which reduce transportation related emissions.
3. **Surface Transportation Program (STP)** – The STP provides flexible funding that may be used by states and localities for projects on any Federal-aid highway, including the NHS, bridge projects on any public road, transit capital projects, and intracity and intercity bus terminals and facilities.
4. **National Highway Performance Program (NHPP)** – The NHPP provides funding on roadways designated on the National Highway System supporting progress toward the achievement of national performance goals for improving infrastructure condition, safety, congestion reduction, system reliability, or freight movement.
5. **Highway Safety Improvement Program (HSIP)** – The HSIP provides funding to achieve a significant reduction in traffic fatalities and serious injuries on all public roads.
6. **State Planning and Research (SPR)** – The SPR provides funding for the planning of future roads highway programs and local public transportation systems and the planning of the financing of such programs and systems, including metropolitan and statewide planning.
7. **Transportation Alternatives Program (TAP)** – The TAP funding is for activities considered under the Transportation Alternatives which include the construction, planning, and design of pedestrian and trail facilities; safety-related infrastructure; and Safe Routes to School (SRTS) program. Other project categories include historic preservation and rehabilitation of historic transportation facilities; vegetation management practices, environmental mitigation activities, projects that reduce vehicle-caused wildlife mortality, and the recreational trails program.
8. **Special Federal Appropriations (SFA)** – The SFA are a combination of Congressionally Designated Projects or Discretionary Programs. These are not formula based funding and allocated to a particular project through designation or competitive selection.

### Federal-aid Transit Funding

1. **Planning Programs, Sections 5303, 5304, 5305** – Provides planning funds for state Departments of Transportation for statewide Planning.
2. **Transit Urbanized Area Formula Program, Section 5307** – Formula funding program that provides grants for Urbanized Areas (UZA) for public transportation capital investments (and operating expenses in areas under 200,000 population) from the Mass Transit Account of the Highway Trust Fund.
3. **Bus Facility and Bus Programs, Sections 5309 and 5318** – Provides funding for the acquisition of buses for fleet/service expansion and bus related facilities such as maintenance facilities, bus rebuilds, and passenger shelters. These funds are allocated to specific projects at the discretion of Congress.
4. **State Safety Oversight Programs, Section 5329 –** Provides funding for Maryland's state safey oversight program.

5. **Capital Investment Grants "New Starts," Section 5309** – This Section 5309 program provides funding primarily for Major Fixed Guideway Capital Investment projects (New Starts) and Capital Investment Grants of $75 million of less (Small Starts).
6. **Enhanced Mobility of Seniors and Individuals with Disabilities, Section 5310** – Provides funding to states for the purpose of assisting private nonprofit groups in meeting the transportation needs of older adults and people with disabilities when the transportation service provided is unavailable, insufficient, or inappropriate to meeting these needs. The program aims to improve mobility for seniors and individuals with disabilities by removing barriers to transportation service and expanding transportation mobility options.
7. **Transit Funds for Areas Other Than Urbanized Areas, Section 5311** – Provides capital and operating assistance for rural and small urban public transportation systems.
8. **Congestion Mitigation and Air Quality (CMAQ)** – The Congestion Mitigation and Air Quality Improvement Program provides funding for projects and programs in air quality nonattainment and maintenance areas for ozone, carbon monoxide (CO), and particulate matter (PM-10, PM-2.5) which reduce transportation related emissions.
9. **Preventive Maintenance Project Type** – Provides funding for preventive maintenance based on grant programs that have a capital component.
10. **State of Good Repair, Section 5337** – Provides capital assistance for maintenance, replacement, and rehabilitation projects of high-intensity fixed guideway and bus systems to help transit agencies maintain assets in a **state of good repair**.
11. **Bus and Bus Facilities Formula, Section 5339** – Provides funding to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities including technological changes or innovations to modify low or no emission vehicles or facilities.

**Federal-aid Phases**

**Project Planning (PP)** – This funding is the initial phase of project development where the need and feasibility of a project is documented and scoping is broad and involves the public.

**Preliminary Engineering and Final Design (PE/FD)** – This funding provides for projects including preliminary and final design. these funds involve detailed environmental studies and engineering to obtain NEPA are under preliminary design. Design activities following preliminary design involve the preparation of final construction plans and are under final design.

**Right-of-Way (RW)** – This funding provides for acquisition of necessary rights-of-way in which a project will be constructed or to protect corridors for future project construction.

**Construction (CO)** – This funding provides for the building and implementation of the designed facility and may include costs associated with relocating utilities as well.

**Other** - This funding provides for transit project expenditures. It also can provide for a variety of non-capital highway project-related expenditures, most often associated with ongoing technology, intelligent transportation systems, and monitoring.

**Total** – This is the sum of any funding shown for preliminary engineering and final design, right-of-way, construction, and other funding.

**Federal-Aid** – This is the amount of the total that will utilize federal funding.

## APPENDIX G - Glossary

| ACRONYM | DEFINITION |
|---|---|
| AC | Advance Construction |
| AR | Attainment Report |
| BRAC | Defense Base Closure and Realignment Commission |
| BRTB | Baltimore Regional Transportation Board |

**APPENDIX H – MTA Rural Projects (Non-MPO and Statewide)**
(Not in TIPs)

MARYLAND TRANSIT ADMINISTRATION

**STIP ID:** MTA-2019-01

**Capital Project Number(s):** 0210

**Project Title: Capital and Operating Program Assistance to Private Non-profit Agencies for the Transportation of Elderly and Persons with Disabilities.**

**Description:**
An ongoing program to provide private non-profit agencies for the transportation of elderly and persons with disabilities.

**Justification:**
This program will enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit dependent populations beyond traditional public transportation.

**Section 5310 Formula Program**

MARYLAND TRANSIT ADMINISTRATION
**STIP ID:** MTA-2019-02
**Capital Project Number(s):** 0218
**Project Title: Capital and Operating Assistance to Rural Transit Systems**

**Description:**
Section 5311 Capital and Operating Assistance provided to transit systems located outside of urbanized areas. This is an ongoing project.

**Justification:**
To fulfill a demonstrated need for general purpose transportation for persons living or traveling in rural areas.

**Section 5311 Formula Program**

MARYLAND TRANSIT ADMINISTRATION
**STIP ID:** MTA-2019-14

**Capital Project Number(s):** 1442, 1710, 1729
**Project Title:** 5304 STIP

**Description:**
Development of Transit Development Plans for Locally Operated Transit Systems and Regional Transit Planning efforts throughout the State of Maryland.

**Justification:**
These plans are used by individual LOTS and MDOT MTA to enhance transit. A completed TDP serves as a guide for the local transit system, providing a roadmap for implementing service and/or organizational changes, improvements, and/or potential expansion during the five-year period.

**Section 5304 Formula Program**

## APPENDIX I – SHA Rural Projects (Non-MPO and Statewide)

The Maryland State Highway Administration provides federal fund source information for all TIP and STIP areawide system preservation projects with quarterly submittal of project tracking sheets to FHWA staff. For STIP and small MPOs (HEPMPO, CSM-MPO, WILMAPCO and SWMPO) system preservation projects, this information is provided in a separate field in each tracking sheet and is consistent across areawide projects. For TPB and BRTB system preservation projects, funding flows for system preservation areawide projects are organized by federal fund source in tracking sheets. All tracking sheet reports are submitted within one month after the close of each federal fiscal quarter to the FHWA Maryland Division Planning Program Manager.

### Grouped Projects Detailed Descriptions

**Areawide Bridge Rehabilitation**
An ongoing program to provide upgrades to and maintenance of structures on SHA's highway network. These non-capacity improvements include replacement (less than full bridge replacement), deck rehabilitation/replacement, substructure rehabilitation/replacement, superstructure rehabilitation/replacement, parapet reconstruction, cleaning and painting, and general maintenance. In addition, this program may include related administrative activities necessary to ensure delivery of these improvements including SHA bridge inspection programs that assist in identifying capital projects.

**SHA Funds** 80

**Improvements** *Statewide* – bridge inspection, cleaning, deck overlay, deck replacement/rehabilitation, painting (spot, comprehensive), parapet modification/reconstruction, pedestrian facilities completed as part of a bridge project, substructure replacement/rehabilitation, superstructure replacement/rehabilitation

**Areawide Congestion Management**

An ongoing program to provide traffic control, management, and monitoring on SHA's highway network. These improvements include deployment of variable message signs, video for traffic management, i.e., CCTV, traffic management detectors, signal systemization and remote timing, permanent congestion monitoring systems, intelligent transportation systems, and the development of park-and-ride facilities. In addition, this program may include related administrative activities necessary to ensure delivery of these improvements.

**SHA Funds** 81, 86

**Improvements** *Statewide* – intelligent transportation system deployment, park-and-ride facilities (design, construction, expansion, lighting), permanent congestion monitoring systems, signal systemization, remote timing, traffic management detectors, traffic management video/CCTV, variable message signing

**Areawide Environmental Projects**

An ongoing program to provide environmental and aesthetic improvements on SHA's highway network. These non-capacity improvements may include but are not limited to noise abatement, wetland management and rehabilitation, reforestation, landscaping, scenic beautification, and bicycle and pedestrian facilities. In addition, this program may include related administrative activities necessary to ensure delivery of these improvements.

In addition, in those regions outside the Baltimore and Washington metropolitan planning areas, this ongoing program includes Transportation Alternatives, Safe Routes to School, and Recreational Trails program projects that expand travel choices and enhance user experience by improving the cultural, historic, and environmental aspects of transportation infrastructure. These improvements include bicycle and pedestrian facilities, rehabilitation of historic transportation facilities, conversion and use of abandoned railroad corridors, archeological activities related to transportation impacts, and highway runoff-related pollution mitigation.

**SHA Funds** 24, 25*, 26, 49, 74, 82, 88

**Improvements** *Statewide* – ADA improvements; bicycle/pedestrian facilities; drainage improvements (areas of flooding, road closures); environmental compliance; landscaping; noise abatement; noise barrier and berm construction, retrofitting, and rehabilitation; trail facilities; reforestation and tree planting; rest areas; scenic beautification; total maximum daily load (TMDL) for stormwater management; wildflower seeding

*Only outside the Baltimore and Washington metropolitan planning areas* – Transportation Alternatives, Safe Routes to School, and Recreational Trails program improvements including bicycle/pedestrian improvements, conversion/use of abandoned railroad corridors, highway runoff-related water pollution mitigation, historic transportation facility rehabilitation, landscaping, transportation-related archeological activities, and urban greenways

* *as noted on the next page, SHA fund 25 improvements, which cover federal Transportation Alternatives, Safe Routes to School, and Recreational Trails program projects, are programmed in a separate grouped project, Areawide Transportation Alternatives, in only the Baltimore and Washington metropolitan planning areas; in the remainder of Maryland, these projects are included in the Areawide Environmental Projects grouped project*

**Areawide Transportation Alternatives***

In only the Baltimore and Washington metropolitan planning areas, this ongoing program includes Transportation Alternatives, Safe Routes to School, and Recreational Trails program projects that expand travel choice and enhance user experience by improving the cultural, historic, and environmental aspects of transportation infrastructure. These improvements includebicycle and pedestrian facilities, rehabilitation of historic transportation facilities, conversion and use of abandoned railroad corridors, archeological activities related to transportation impacts, and highway runoff-related pollution mitigation. In addition, this program may include related administrative activities necessary to ensure delivery of these improvements.

**SHA Funds** 25

**Improvements** *Only within the Baltimore and Washington metropolitan planning areas* – Transportation Alternatives, Safe Routes to School, and Recreational Trails programs improvements including bicycle/pedestrian improvements, conversion/use of abandoned railroad corridors, highway runoff-related water pollution mitigation, historic transportation facility rehabilitation, landscaping, transportation-related archeological activities, and urban greenways

**Areawide Resurfacing and Rehabilitation**

An ongoing program to provide periodic resurfacing and upgrading of auxiliary features on SHA's highway network. These non-capacity improvements include milling, patching, sealing, and resurfacing of existing deteriorated SHA highways; ADA upgrades; guardrail installation; sidewalk construction; shared-use path construction; pavement markings/striping; ground improvement, slope repairs, sinkhole mitigations, and drainage improvements. In addition, this program may include related administrative activities necessary to ensure delivery of these improvements.

**SHA Funds** 77

**Improvements** *Statewide* – ADA improvements, concrete patching, guardrail improvements, joint sealing, milling, patchwork, pavement markings/striping, resurfacing, shared-use paths, sidewalk, ground improvement, slope repairs, sinkhole mitigations, drainage improvements, and striping/marking

**Areawide Safety and Spot Improvements**

An ongoing program to provide localized improvements to address safety and/or operational issues on SHA's highway network. These improvements include bypass lanes, acceleration and deceleration lanes, turn lanes, railroad crossings, intersection realignment, geometric improvements, safety improvements, pavement markings/striping, ADA upgrades, guardrails, roundabouts, slope repairs, drainage improvements, and joint sealing. In addition, this program may include related administrative activities necessary to ensure delivery of these improvements.

**SHA Funds** 23, 27, 30, 32, 33, 67, 75, 76, 78, 79, 85, 87

**Improvements** *Statewide* – acceleration/deceleration lanes, ADA improvements, bridge inspection, bypass lanes, crash prevention, drainage improvements, geometric improvements, guardrail improvements, intersection capacity improvements, intersection realignment, joint sealing, major storm damage repairs, pavement markings/striping, railroad crossings, ramp modifications, rest areas, roundabouts, safety improvements, school access improvements, sinkhole repairs, slope repairs, truck weigh stations, turn lanes, unforeseen roadway/bridge emergency repairs

**Areawide Urban Reconstruction**

An ongoing program to provide roadway rehabilitation in municipalities and urban areas on SHA highways. These non-capacity improvements include drainage improvements, curb and gutter improvements, pavement milling and resurfacing, sidewalks, shared-use paths, signage, pavement markings/striping, and lighting improvements. In addition, this program may include related administrative activities necessary to ensure delivery of these improvements.

**SHA Funds** 84

**Improvements** *Statewide* – ADA improvements, bicycle and pedestrian improvements, curb and gutter improvements, drainage reconstruction, landscaping, lighting, pavement markings/striping, pavement reconstruction (milling, resurfacing), shared-use paths, sidewalks, signage, street furniture, urban amenity improvements

**Areawide Carbon Reduction Program**

The Federal Highway Administration Carbon Reduction Program supports a variety of strategies to address transportation's role as the largest source of green house gas emissions in the State of Maryland. The program aims to reduce transportation carbon dioxide emissions including traffic management, energy efficient traffic control devices and street lights, pedestrian facilities, port electrification and efforts to reduce environmental and community impacts of freight movement. In addition, this program may include related administrative activities necessary to ensure delivery of these improvements.

**SHA Funds** 34

**Improvements** *Statewide* – Traffic management technologies, energy efficient traffic control devices and street lights, bicycle and pedestrian improvements, shared-use paths, sidewalks, port electrification, electrical vehicle chargers, and low carbon emission vehicles.

**Project** US 220, McMullen Highway
**Location** Allegany County
**Responsible Agency** SHA
**Description** Study to upgrade and/or relocate US 220 (4.8 miles) and/or MD 53 (3.1 miles) from I68/US 40 to Cresaptown. This study represents a portion of an approved 2014 Maryland-West Virginia joint study of two Appalachian Development Highway System corridors, I-68 and US 48. The focus of improvements are at the US 220 at MD 53 intersection. Improvements will remove primary truck traffic movements from the central part of Cresaptown. On-road bike lanes are included.

*Note: 99% federal funding reflects use of multiple federal formula funds and private funding, as well as to reflect the approved federal aid agreement for each project*

Note: New obligations under Maryland's National Electric Vehicle Infrastructure (NEVI) Program have been paused since the Federal Highway Administration's letter dated February 6, 2025, announced rescinded federal guidance for the NEVI Program and previous NEVI Plan approvals. However, Maryland is still congressionally authorized to receive approximately $63 million total in NEVI Formula Program funds from the FHWA pending updated federal guidance promised in the spring. Should NEVI Formula Program funds appropriated to states be rescinded, the Maryland Department of Transportation will remove these planned funds from its capital program accordingly.

## APPENDIX J – National and State Performance Management Goals

### National and State Performance Management Goals

The Infrastructure Investment and Jobs Act (IIJA) continues the work established in the Fixing America's Surface Transportation (FAST) Act and the Moving Ahead for Progress in the 21st Century Act (MAP-21) legislation, of shifting the nation's surface transportation program to a performance and outcome-based program, in which resources are invested in projects to achieve targets toward regional, state, and national goals. National performance goals were established and are described in 23 USC§150, and the FHWA and FTA have published a series of rules that establish regulations to assess progress towards the seven national goals. The regulations direct states, Metropolitan Planning Organizations (MPOs), and transit providers to establish targets and track specific measures related to the conditions and performance of their surface transportation systems in areas that include bridges, pavement, safety, congestion, freight, and transit asset management. States and MPOs are to incorporate the measures into their transportation improvement programs and long-range transportation plans, and other performance-based planning and programming resources to demonstrate how proposed transportation projects contribute to the achievement performance objectives and national goals.

### MDOT Performance

In addition to its long-standing efforts to measure progress, as documented in the State's Long-Range Transportation Plan called the "Playbook", Annual Attainment Report (AR), and the Managing for Results (MFR) Report, MDOT has established performance targets for safety, infrastructure condition, system performance, congestion mitigation, and air quality for the State of Maryland, as required by the Federal Transportation Performance Management (TPM) Program.

Several federal formula funding programs, some established by MAP-21 and some by the IIJA, including National Highway Performance Program (NHPP), Surface Transportation Program Block Grant (STPBG), Safety (HSIP), Railway-Highway Crossing Program, Congestion Mitigation/Air Quality (CMAQ), Transportation Alternatives Program (TAP), Federal Transit Administration (FTA) programs, Planning (SPR/PL), National Highway Freight Program (NHFP), Carbon Reduction Program (CRP), and Promoting Resilient Operations for Transformative, Efficient, and Cost-saving Transportation (PROTECT) Program, are intertwined with the TPM program in that a) there can be financial penalties assessed to the DOT in instances where prescribed minimum levels of performance are exceeded and 2) for some performance measures, targets are the quantified based on the estimated benefits associated with projects programmed with these funds. MDOT strategically selects and programs projects that will aid in moving the needle and implements innovative and dynamic investment, programmatic, and system preservation strategies in order to achieve targeted levels of performance. Through the programmed strategic investments in the STIP, MDOT anticipates achieving those levels in key performance areas, using data-driven prioritization processes to select projects that achieve meaningful and measurable outcomes for Marylanders.

### *Highway Safety*

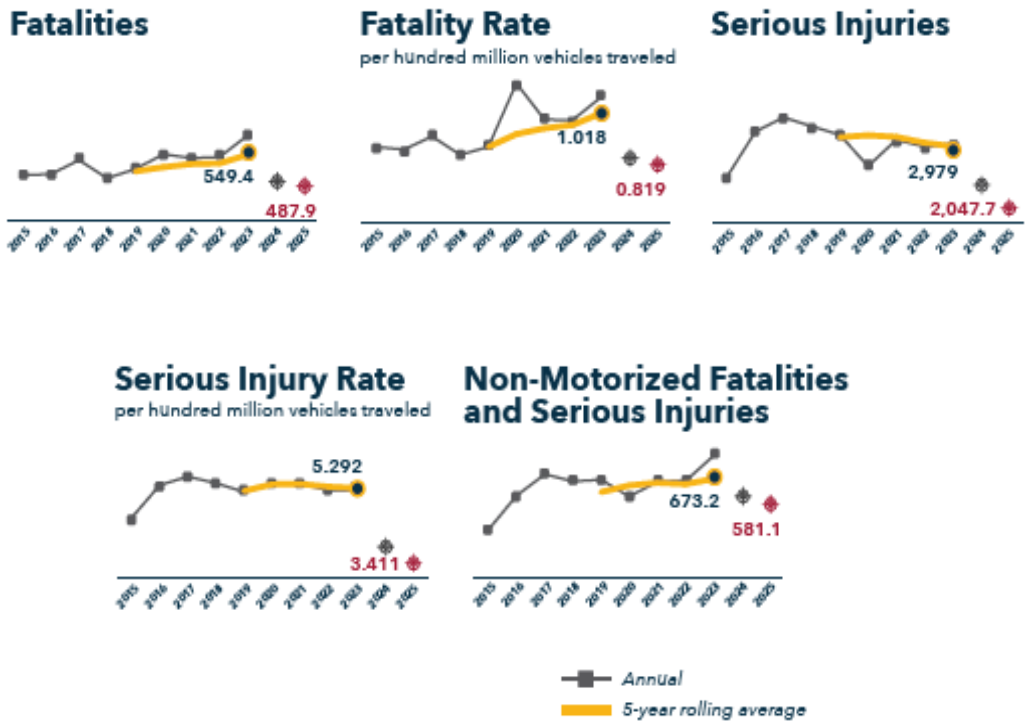

Maryland's Vision Zero law sets a goal of zero vehicle-related deaths or serious injuries on State roadways by the year 2030. Vision Zero is a data-driven effort to reduce fatalities and serious injuries by developing strong leadership in organizations that directly impact highway safety.

MDOT establishes Highway Safety Performance Targets for Maryland, see Figure 1, on an annual basis in the Highway Safety Improvement Program (HSIP) Annual Report to the Federal Highway Administration (FHWA).

Maryland leaders continue to build partnerships with government agencies, private citizens, traditional safety advocates, and nontraditional partners to strengthen State and local efforts to improve the safety of our transportation system for all users. MDOT collaborates with MPOs to set regional safety targets and foster a commitment by State, Municipalities, and Local Public Agencies to partner to address safety Statewide.

MDOT documents its performance targets, safety initiatives and strategies developed in coordination with partners to address safety in several plans and reports, including: the Maryland 2021-2025 Strategic Highway Safety Plan (SHSP), the Highway Safety Improvement Program (HSIP) Annual Report, the 2050 Maryland Transportation Plan in support of MDOT's long-term goals for performance management and project programming, and the MDOT Annual Attainment Report on Transportation System Performance.

**Figure 1.** Maryland Safety Performance Targets, August 2024

***Infrastructure Condition***

The National Highway System (NHS) continues to be our most critical connector to life's opportunities. MDOT is committed to providing reliable and equitable transportation solutions to Maryland's traveling public. To honor these commitments, MDOT implement sound asset management principles in our work. Asset management helps us preserve and improve the existing highway system through efficient maintenance and delivery of safety, mobility, and capital improvement projects. With the implementation of our central operations Asset Management Program, MDOT is equipped to lead by example.

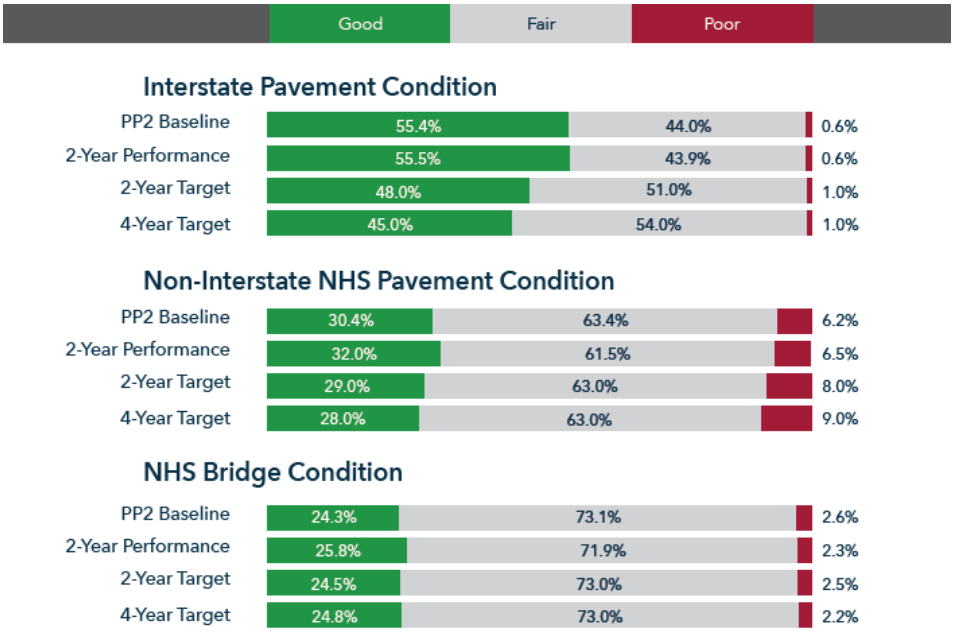

The 2022 Maryland Transportation Asset Management Plan (TAMP), certified by the Federal Highway Administration (FHWA), outlines short term bridge and pavement condition performance targets and long-term performance objectives as part of a performance-based approach to asset management using performance measures to assess system performance, identify needs, and develop investment priorities. Infrastructure condition targets, see Figure 2, for the National Highway System (NHS) in Maryland were developed through an iterative, collaborative process which included monitoring performance trends, analyzing life cycle plans, and reevaluating future performance projections in partnership with the partner owners of NHS bridge and pavement assets, including:

- National Park Service
- United States Army Corps of Engineers
- Department of Natural Resources
- County Governments
- Municipalities

- Local Park Commissions

The TAMP serves as a tactical blueprint for all partner owners of NHS assets to work together to achieve the performance objectives through lifecycle management strategies. In the short term, they will monitor progress toward achievement of the 2- and 4- year performance targets to assess how the STIP is implementing the TAMP. In addition, the information compiled through each year's review of investment information to support the annual consistency determination will demonstrate how the State is implementing the TAMP. With this information, MDOT's State Highway Administration will determine whether adjustments to planned investments in the STIP will be needed to implement the TAMP to help Maryland achieve its performance targets and long-term performance objectives.

**Figure 2.** Maryland Infrastructure Condition Performance Targets, October 2024

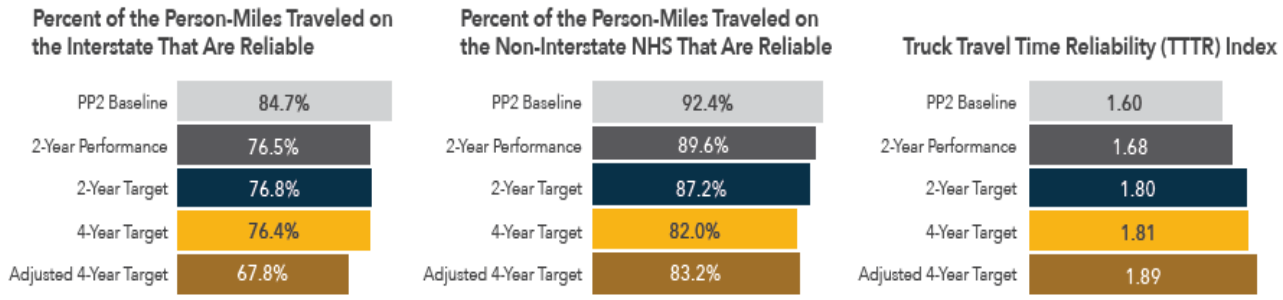

***System Performance, Congestion Management, and Air Quality***

System Performance and Freight Movement performance targets were established using a novel forecasting methodology that relates segment-level roadway capacity and traffic volume to reliability performance to forecast future performance as roadway volumes and capacities change, see Figure 3.

MDOT SHA addresses mobility and reliability through comprehensive improvement efforts, including some of which are guided by the State Freight Plan (2022 Update), identified in the Annual CTP, and tracked in the annual Mobility Report. Regional and corridor level efforts; pre-planning and planning efforts; and operational and capital activities are targeted with the MPOs and local jurisdictions to improve vehicle and freight movement on the Interstate System.

MDOT continues to prioritize incident management through programs like The Coordinated Highways Action Response Team (CHART) which cleared thousands of incidents on the NHS to help ensure consistent mobility. Signal retiming and timing reviews across the network have contributed to millions of dollars in annual user savings.

**Figure 3.** Maryland System Performance Targets, October 2024

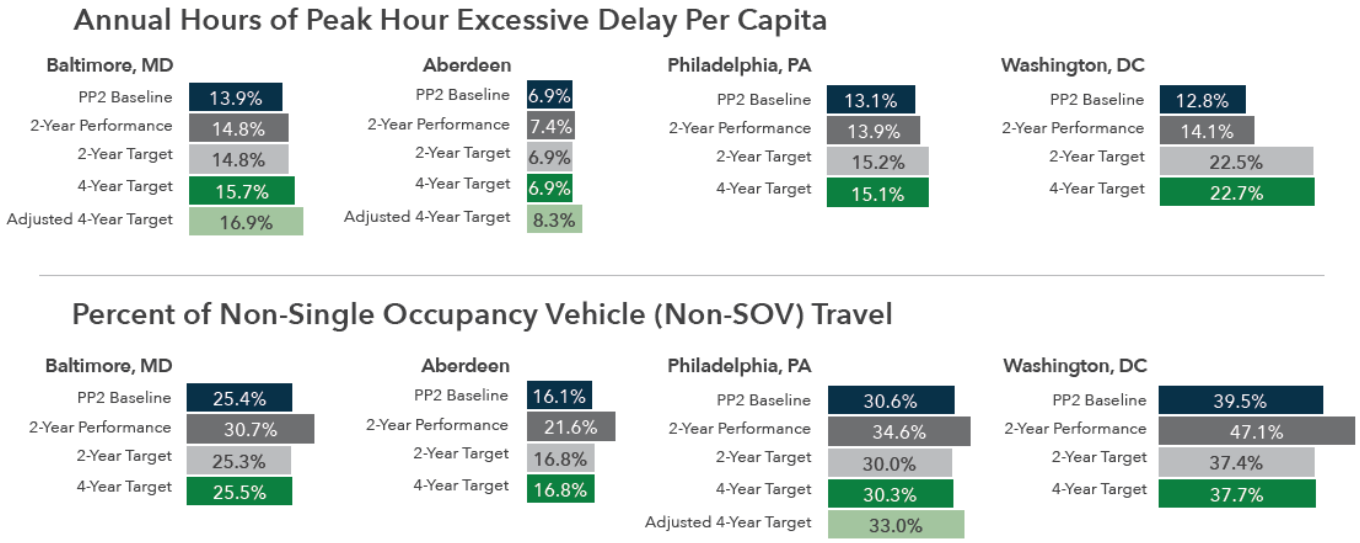

The rate of population and economic growth in Maryland has resulted in increased demands on the State's transportation system and requires a robust and dynamic multimodal system to provide for and address its unique transportation needs with both the Baltimore and DC-Maryland-Virginia regions see some the most significant congestive conditions in the nation losing more than 50 hours per year to congestion.

MDOT and urbanized area partners have made the commitment to managing this congestion, implementing programs like the Guaranteed Ride Home, a free commuter insurance program for commuters who use public and alternative modes of transportation within the Baltimore and Washington D.C. Metropolitan Areas. The program Offers up to 4 free rides home per year when usual transportation options are limited.

MDOT continues to promote Commuter Choice Maryland, which encourages commuters to explore and use alternate means of transportation to and from work, giving them travel choices when convenient to them, such as transit, ridesharing (carpool/vanpool), biking, walking, teleworking, and alternative flexible work schedules. All of these options help to reduce commuter stress, reduce congestion and conserve energy.

Transit Apps like the CharmPass Mobile Ticketing app allows riders to pay for MDOT MTA services from a smart phone for all Local Bus, Metro SubwayLink, Light RailLink, MARC Train, and Commuter Bus Services.

**Figure 4.** Congestion Performance Targets, October 2024

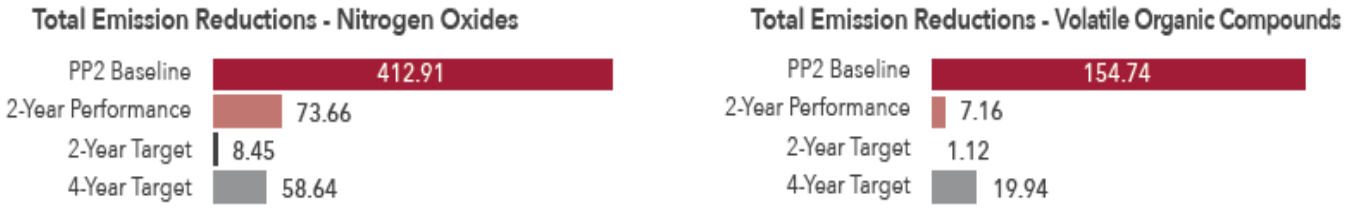

The on-road mobile source emissions targets, see Figure 5, were developed by the Office of Planning and Capital Programming at the MDOT Secretary's Office by evaluating projected emissions benefits expected from programmed future Congestion Management and Air Quality (CMAQ) Projects.

In accordance with Map-21/FAST Act regulations, the Baltimore Regional Transportation Board (BRTB), National Capital Region Transportation Planning Board (TPB), and the Wilmington Area Planning Council (WILMAPCO) as part of the Delaware Valley Region Planning Council transportation management area MPOs are required to draft Congestion Management Process document, bi-annually. The Congestion Management Process (CMP) monitors the transportation network to determine the locations and sources of congestion in the TMAs, and identifies and implements strategies that alleviate congestion.

All projects in this STIP that will result in a significant increase in carrying capacity for single occupant vehicles are supported by a fully operational congestion management process, in place at each applicable MPO.

**Figure 5.** Maryland Air Quality Performance Targets, 2024

Employing performance-based planning and programming strategies to support investment decisions is a long-lasting collaborative effort with key stakeholders to deliver sustainable investment options to achieve desired system performance. The STIP is the project planning budget document that unifies and reflects MDOT's plan with the performance and asset management-based decision-making federally mandated by MAP-21 and the IIJA.

## Transit Asset Management

MDOT MTA is a Tier 1 transit agency, operating and maintaining $14.9 billion in physical assets to provide transportation services to over 2.2 million people in the State of Maryland. MDOT MTA provides funding (state and federal pass-through), technical support, and assistance to the 23 Locally Operated Transit Systems across the state (20 tier 2 agencies and 3 tier 1 agencies). Every four years, per Federal Transit Administration (FTA) requirement, MDOT MTA updates its Transit Asset Management Plan (TAMP). The MDOT MTA Office of Local Transit Support leads and provides oversight for the tier 2 LOTS and updates a group TAMP on an annual basis, with a major update every four years per FTA requirement. MDOT MTA and LOTS update National Transit Database (NTD) performance targets and actuals on an annual basis.

Per 49 CFR 625 and 630, MDOT MTA is required to measure the performance of four asset categories. These asset categories and associated performance measures provide the performance targets and actuals for each measure required by FTA for submittal through the annual NTD reporting process. Targets are developed using asset information, including condition and programmed procurements for asset renewal or replacement.

FTA-Required Performance Measures by Asset Category (MDOT MTA TAMP, 2022)

| Asset Category | Performance Measure |
|---|---|
| **Rolling Stock (Revenue Vehicles)** | % of assets at or past their useful life benchmark |
| **Equipment (Non-Revenue Vehicles)** | % of assets at or past their useful life benchmark |
| **Facilities (Including Stations)** | % of assets rated below condition 3 on TERM scale |
| **Guideway** | % of directional route miles under performance restrictions |

*NTD Performance Targets and Actuals (2022-2025)*

| Asset Category | NTD Asset Class | ULB | 2022 Performance (%) | 2023 Target (%) | 2023 Actuals (%) | 2024 Target (%) | 2024 Actuals (%) | 2025 Target (%) |

| | LR – Light Rail | N/A | 8.3 | 6.5 | 4.5 | 3.9 | 1.7 | 3.9 |

**The ULB was adjusted to better fit MTA's needs.*

*** Light and Commuter Rail Vehicles have a range of ULB due to staggered mid-life overhauls adding years of life to vehicles at different ages.*

## LOTS (Tier-2) Performance Measures and Actuals

Twenty Locally Operated Transit Systems (LOTS) in the state of Maryland who are participants in the Maryland LOTS Tier II Group Transit Asset Management Plan (TAMP). Of the 20 LOTS, 16 offer both demand response and fixed route service, three (3) offer fixed route only, and one (1) offers demand response service only. All fixed route services include complimentary Americans with Disabilities Act (ADA) services.

As of the end of 2023, the Tier II LOTS group manage an asset inventory of 665 revenue vehicles, most of which are cutaway buses or medium- and heavy-duty buses. In addition, there are 43 facilities where LOTS have direct capital responsibility, mainly used for administrative and maintenance functions, with some passenger and parking facilities, and 89 non-revenue vehicles including automobiles, trucks, and other rubber-tire vehicles.

Performance targets for each asset class were set based on 2023 performance and inventory changes expected to occur in 2024. For facilities, targets reflect the physical condition assessment schedule; at this time, all LOTS facilities have not been assessed but there is a continued effort to ensure that the LOTS will maintain compliance with the four-year condition assessment requirement for facilities.

At the end of 2024, the Tier II LOTS revenue vehicle asset inventory included 12 articulated buses, 257 buses, 339 cutaway buses, 21 vans, 20 minivans, 11 automobiles, 1 trolleybus, and 4 ferry boats. The 2024 performance targets for these asset classes shown below, were based on inventory collected by MDOT MTA from each LOTS agency in 2023 and the 2023 performance reflects a summary of the condition of asset inventory compiled from the LOTS in 2024 (shown below). Collectively, Tier II LOTS manage an asset inventory of 89 non-revenue vehicles, including automobiles, trucks, and other rubber-tire vehicles. The 2024 performance targets and 2024 performance for these asset classes are shown in the table below.

Tier II LOTS use an inventory of 43 facilities that they have capital responsibility for to support transit services. Of these, 38 are administrative and maintenance facilities, with only 5 passenger and parking facilities. The performance targets and 2024 performance for these asset classes are shown in the table below.

Overall, the Maryland Tier II LOTS group achieved the targets established in 2024 for all asset classes, except for minivans and non-revenue automobiles. Looking forward, the group will continue to refine data collection processes and ultimately improve data and analysis quality, with expectations for continuous improvement in meeting targets. As illustrated in the Group TAMP, continuous improvement is a priority and an essential part of asset management for Maryland and several initiatives are being implemented to improve the group's maturity in asset management practice towards increased state of good repair.

*Tier-2 NTD Performance Targets and Actuals (2022-2024)*

| Asset Category | NTD Asset Class | 2022 Performance (%) | 2023 Target (%) | 2023 Actuals (%) | 2024 Target (%) | 2024 Actuals (%) |
|---|---|---|---|---|---|---|
| **Rolling Stock (Revenue Vehicles)** | AB – Articulated Bus | 60 | 60 | 50 | 38 | 42 |
| | AO – Automobile | 57 | 46 | 45 | 46 | 45 |
| | BU – Bus | 19 | 22 | 12 | 11 | 11 |
| | CU – Cutaway | 28 | 32 | 30 | 27 | 27 |
| | FB – Ferry Boat | 75 | 100 | 100 | 100 | 100 |

| | | | | | | |
|---|---|---|---|---|---|---|
| | MV – Minivan | 12 | 6 | 25 | 18 | 35 |
| | TB – Trolleybus | 50 | 100 | 100 | 100 | 100 |
| | VN – Van | 13 | 18 | 13 | 13 | 10 |
| **Equipment (Non-Revenue Vehicles)** | Automobiles | 36 | 45 | 56 | 46 | 52 |
| | Trucks & Other Rubber Tire Vehicles | 56 | 59 | 53 | 59 | 62 |
| **Facilities** | Administrative/Maintenance | 0 | 5 | 0 | 0 | 0 |
| | Passenger/Parking | 0 | 0 | 0 | 0 | 0 |

**Public Transportation Agency Safety Plans (PTASP)**

The setting of annual transit safety targets is one of the requirements of the rulemaking for Public Transportation Agency Safety Plans (PTASP) under 49 CFR Part 673. An update to the PTASP regulation was published in the Federal Register on April 11, 2024. The effective date of the rule was May 13, 2024. Each applicable provider of public transportation is required to adopt a PTASP implementing the principles of Safety Management Systems (SMS) to improve safety performance by reducing the number and rates of safety events, injuries, and assaults on transit workers. The National Safety Plan identifies fourteen (14) safety performance measures for all agencies subject to the PTASP regulation. In addition, annual targets for safety performance targets must developed and set by MTA's Joint Safety Committee, which is also responsible for the annual review and update to the MTA PTASP. These safety targets were shared with the Maryland Metropolitan Planning Organizations (MPOs) and adopted by their boards.

The full MDOT MTA – Public Transportation Agency Safety Plan (PTASP) can be found at MDOT's webpage "Serious About Safety, which highlights safety initiatives and plans at MDOT and across the modal administrations – https://mdot.maryland.gov/tso/pages/Index.aspx?PageId=188.

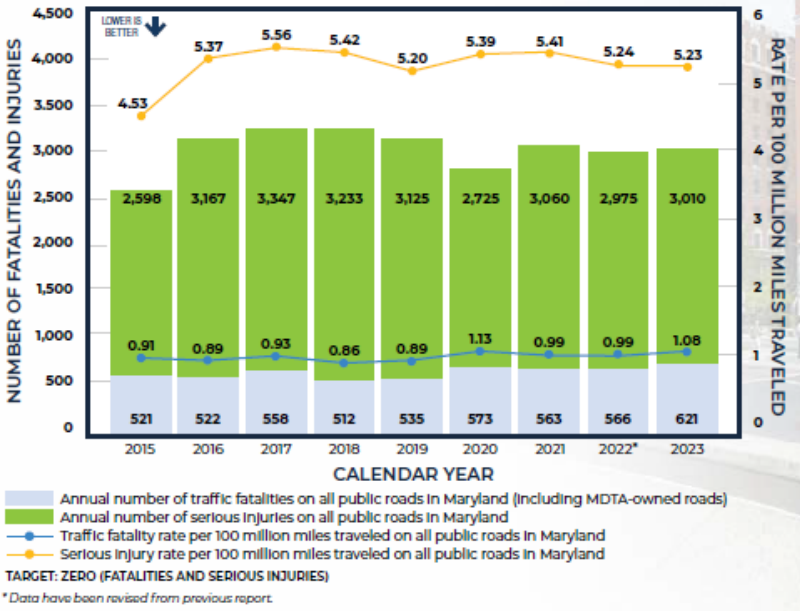

## Annual Attainment Report

MDOT has been tracking our progress with the Annual Attainment Report long before MAP-21 and the FAST Act. The following are pages from the Annual Attainment Report that reflect how each of the Targets are affected by our investments.

### Objective: Reduce the Number of Lives Lost and Injuries Sustained on Maryland's Transportation System

FACING CHALLENGES

**ANNUAL NUMBER OF FATALITIES ON ALL MARYLAND PUBLIC ROADS & ANNUAL NUMBER OF SERIOUS INJURIES ON ALL MARYLAND PUBLIC ROADS**

TARGET: ZERO (FATALITIES AND SERIOUS INJURIES)

*Data have been revised from previous report.

#### What Is the Trend?

- Traffic fatalities rose materially by 9.7% to 621 in 2023 from 566 in 2022. The fatality rate rose by 8.6% from 0.99 to 1.08, while Vehicle Miles Traveled (VMT) increased by only 1.3%. Overall, serious injuries remained stable with only a 1.1% increase in 2023 compared to 2022.
- In June 2023, the MVA Maryland Highway Safety Office (MHSO) conducted its annual seat belt survey at 140 sites, observing 50,358 vehicles. The survey showed a slight decrease in seat belt usage to 92.1% from 92.7% in 2022. Unrestrained occupant fatalities fell to 115 from 146 in 2022, but the number of unknowns increased from 39 to 74, indicating issues with crash report data. Despite some long-term progress, almost 10% of Maryland drivers remain unrestrained and almost half of those killed in crashes were not wearing seat belts. Research indicates that if 100% of occupants had been restrained in 2023, an estimated 52 lives could have been saved.

#### What Are Future Strategies?

- MDOT will employ a comprehensive strategy that integrates data collection, analysis and evaluation to address critical issues such as distracted and impaired driving, roadway environment, occupant protection and pedestrian and bicycle safety. MDOT plans to enhance enforcement, promote safety through outreach and media campaigns and support legislative and technological advancements, in conjunction with engineering and infrastructure improvements. Additionally, MHSO is researching police discretion in traffic stops to adapt enforcement strategies. Some jurisdictions are increasing automated enforcement, a strategy that MHSO is studying for effectiveness.
- In September 2024, Governor Moore announced $13.3 million in federal highway safety grants to 87 organizations across Maryland as part of a Statewide focus to prevent motor vehicle crashes and eliminate roadway fatalities.
- MDOT monitors fluctuations in traffic safety and strives to prevent injuries and fatalities through the Maryland SHSP. In 2021, MDOT launched the 2021-2025 SHSP, outlining strategies to reach this goal. MDOT will update the SHSP for 2026-2030, incorporating the Safe Systems Approach.

## ANNUAL NUMBER OF BICYCLE AND PEDESTRIAN FATALITIES AND SERIOUS INJURIES ON ALL MARYLAND PUBLIC ROADS

FACING CHALLENGES

TARGET: ZERO (FATALITIES AND SERIOUS INJURIES)

### What Is the Trend?

- In 2023, 621 people were killed, including 157 pedestrians and 15 bicyclists, an increase compared to 2022 with 566 fatalities, including 130 pedestrian and 11 bicyclists. Both pedestrian and bicycle serious injuries also increased in 2023, with bicycle serious injuries peaking at 92, the highest over the last nine years.
- MDOT is advancing pedestrian and bicycle infrastructure projects through the Pedestrian Safety Action Plan (PSAP), on US 1 (Washington Boulevard), MD 410 (East West Highway), and has made notable improvements on Old Georgetown Road.
- SHA's Pedestrian and Bicyclist Fatalities Infrastructure Review, which began in April 2023, evaluates fatal crashes to identify factors like road design and conditions, supporting innovative safety measures where standard solutions fall short. The results are posted online for the public to view in an interactive map.

### What Are Future Strategies?

- In September 2024, Governor Moore announced 16 million in grants for 36 bicycle, pedestrian and trail projects across Maryland. The grants will benefit 36 projects, from the retrofitting of a trail-highway crossing to new bike paths and pedestrian improvements in school zones, including $13.9 million in federal funding awarded to 26 projects through the Transportation Alternatives Program (TAP) and the Recreational Trails Program (RTP) and $2.1 million in State funding for 10 projects through the Kim Lamphier Bikeways Network Program.
- MHSO continues to work with metropolitan planning organizations (MPOs) in Maryland to promote the pedestrian and bicycle safety high visibility enforcement campaigns, Look Alive (Baltimore Metro) and Street Smart (Washington Metro).
- Several Maryland localities received about $4 million in U.S. Department of Transportation (USDOT) Safe Streets for All (SS4A) grants Rounds 1 and 2, including Garrett County, City of Annapolis, City of College Park, City of Greenbelt, City of New Carrollton, City of Takoma Park, Laurel City, Montgomery County, Town of La Plata, Town of Perryville and University of Maryland in College Park.
- MDOT is implementing the new Complete Streets Policy adopted in 2024 first by administering training and engaging stakeholders. The PSAP also will continue to be put into action, with the first five PSAP Corridors currently underway and eight more chosen for Round 2.

## FREIGHT ORIGINATING AND TERMINATING IN MARYLAND BY MODE— TOTAL TONNAGE AND TOTAL VALUE*

| METHOD FOR MOVING FREIGHT | TOTAL VALUE (MILLIONS) CY 2024*** | TOTAL TONNAGE (THOUSANDS) CY 2024*** |
|---|---|---|
| Air | 7,149 | 70 |
| Multiple Modes & Mail Goods | 71,498 | 6,741 |
| Other** | 192 | 64 |
| Pipeline | 9,260 | 45,438 |
| Rail | 13,807 | 21,004 |
| Truck | 318,265 | 225,613 |
| Water | 80,794 | 52,345 |
| All Freight | 500,964**** | 351,276**** |

**TARGET: NONE**

** Source: U.S. Department of Transportation Freight Analysis Framework (FAF5) the FAF version is 5.0, Freight Analysis Framework (FAF) (ornl.gov). FAF 5 is based on 2017 data. This version makes changes from previous versions in that it includes additional modal detail or classification than in the past. Therefore, previous FAF assessments cannot be accurately compared as value and tonnage may be attributed to different modes in previous versions. It is important to point out that FAF data are estimates and combinations of various data sources to identify what might be tonnage and value by mode for each State and zone in the nation. There is no source that provides a single verified number.*

*** Category "Other" includes movements not elsewhere classified such as flyaway aircraft, in and out of foreign trade zones and shipments for which the mode cannot be determined as stated in the documentation for the FAF5.*

**** CY 2024 data are preliminary and subject to change.*

***** Totals are slightly off when adding due to rounding.*

### What Is the Trend?

- Freight value in Maryland has continued to increase since the pandemic when it decreased between 2019 into 2020. Since 2020, value estimates increased to or near pre-pandemic values except in air cargo. Significant increases in values occurred in the categories of other and unknown freight, water and multiple modes and mail.
- The value of freight transported by water is calculated by MPA and the US Army Corps of Engineers. The Port was experiencing significant increases in cargo, which is expected to decrease this year with the collapse of the Key Bridge in March 2024.
- Freight with the highest value in, out and through Maryland travels by truck followed by water then multiple modes and mail.

### What Are Future Strategies?

- MPA will support freight movement by leveraging federal and State funding sources along with partnering with private sector shippers, logistics, manufacturing, retail and distribution businesses to increase goods movement within, into and out of Maryland.

## ANNUAL PERSON HOURS OF DELAY AND TRAVEL TIME RELIABILITY ON MARYLAND PUBLIC ROADS

FACING CHALLENGES

## TRUCK HOURS OF DELAY AND TRUCK RELIABILITY ON MARYLAND PUBLIC ROADS

TARGET: 2030: 202 MILLION HOURS; 2050: 201 MILLION HOURS

** Data have been revised from previous report.*
*** 2024 data are projected and subject to change.*

TARGET: 2030: 5.3 MILLION HOURS; 2050: 5.3 MILLION HOURS

** 2024 data are projected and subject to change.*

*Note: The methodology used for reporting the 2022 (and prior years) delay values was updated to reflect recent refinements in the Office of Planning and Preliminary Engineering's Maryland Roadway Performance Tool and because the trends calculated seem to more reasonably reflect Average Daily Traffic (ADT)/VMT and congestion trends. The methodology for reliability indices remain the same.*

### What Is the Trend?

- Gradual increases in person hours of delay seem to correlate with the post-pandemic increase of Vehicle Miles Traveled (VMT) starting in 2021. However, it is estimated that delay will continue to increase at a slower rate due to more travel outside of peak hours and VMT increasing more slowly.

### What Are Future Strategies?

- MDOT is working on the Transportation Systems Management and Operations (TSMO) project on I-695 (Baltimore Beltway) from I-70 to MD 43 (White Marsh Boulevard) in Baltimore County to reduce congestion and delay and increase reliability of travel within the project area.
- MDOT is deploying Intelligent Transportation System (ITS) technology where deemed appropriate, such as the US 50 corridor from the Bay Bridge to the Eastern Shore to increase travel reliability.
- The 2022 State Freight Plan identified projects for initial National Highway Freight Program funding to improve freight movement in the State.

## OVERALL ACCEPTABLE PAVEMENT CONDITION

ON TARGET

TARGET: 2030: 90%; 2050: 95%

TARGET: 2030: 20 YEARS; 2050: 20 YEARS

*"Acceptable" pavement condition includes pavements in both "Fair" and "Good" condition.

**Remaining Service Life represents condition on a scale of 0 to 50 years, where 0 years is "Poor", "Fair" is 0 to 20 years, and "Good" is 20 to 50 years.

### What Is the Trend?

- It is expected that the percentage of pavements in "Acceptable" condition will decline from 91% in 2023 to 82% after 2027, with the Remaining Service Life deteriorating from 17 years to 15 years.
- Since the percentage of "Poor" pavements is expected to double due to potential budget shortfalls, it likely will cost exponentially more to restore pavements to a state of good repair as a result of more pavements needing costly reconstruction.
- In 2023, SHA resurfaced about 5.1% of its pavement network, and preventive maintenance covered an additional 10.2% of the network, both slightly higher than reported in 2022.

### What Are Future Strategies?

- SHA continues to increase the use of non-traditional and innovative pavement preservation treatments to extend the service life of SHA roadways at the lowest possible cost.

## NUMBER OF ALL MARYLAND BRIDGES THAT ARE IN POOR CONDITION*

ON TARGET

TARGETS: 2030: 30; 2050: 50

*2024 data are preliminary and subject to change.

### What Is the Trend?

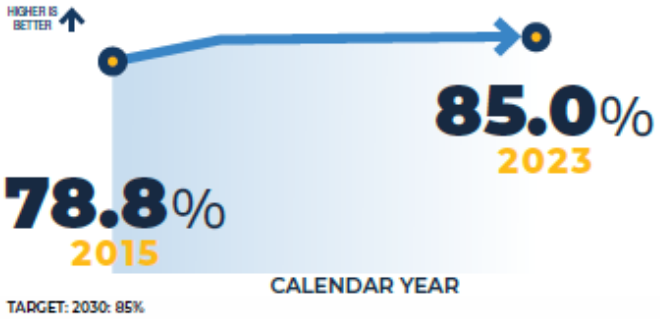

- SHA recorded 22 poor rated bridges during their annual condition submission to FHWA in March 2024, a big reduction since 2015. This success can be attributed to the efficient use of federal funds for current bridge replacement projects and the successful bridge rehabilitation and preservation program.
- SHA continued the bridge rehabilitation and preservation program to address bridges rated as "poor" or "fair" to bring them into a state of good repair and minimize the number of bridges that would achieve a poor rating without rehabilitation.

### What Are Future Strategies?

- SHA will use National Bridge Element data analysis to refine the current Bridge Asset Lifecycle Management Plan. The analysis results in combination with the National Bridge Inventory ratings will refine state of good repair definitions for each bridge in the inventory.
- In August 2024, MDOT received $1.6 million under FHWA's Bridge Replacement Program to support a Planning and Environmental Linkages Study of the I-68 Viaduct in Cumberland.
- SHA will continue to advertise bridge rehabilitation and replacement projects to advance the bridge program. "Poor"–rated bridges such as the Capital Beltway in Prince George's County (I-495/95) and I-70 through Hagerstown and other high-volume roadways will be prioritized. A Large Bridge Program will continue to be developed to rehabilitate and replace larger bridges.

## PERCENTAGE OF THE MARYLAND STATE HIGHWAY NETWORK IN OVERALL PREFERRED MAINTENANCE CONDITION

### What Is the Trend?

- The overall preferred maintenance condition of the Maryland State highway network has remained steady at 85% in the last year, with an 84% average for the last 10 years.
- Some of the highway improvement projects completed in the past year include:
  - US 40 (Pulaski Highway) replacement and widening of bridge decks and superstructures over Little Gunpowder Falls and Big Gunpowder Falls.
  - MD 500 (Queens Chapel Road), from MD 208 (Hamilton Street) to Eastern Avenue, construction of landscaped median with sidewalk and crosswalk improvements.
  - MD 100 (Paul T. Pitcher Memorial Highway), from Howard County Line to MD 170, roadway safety and resurfacing improvements.

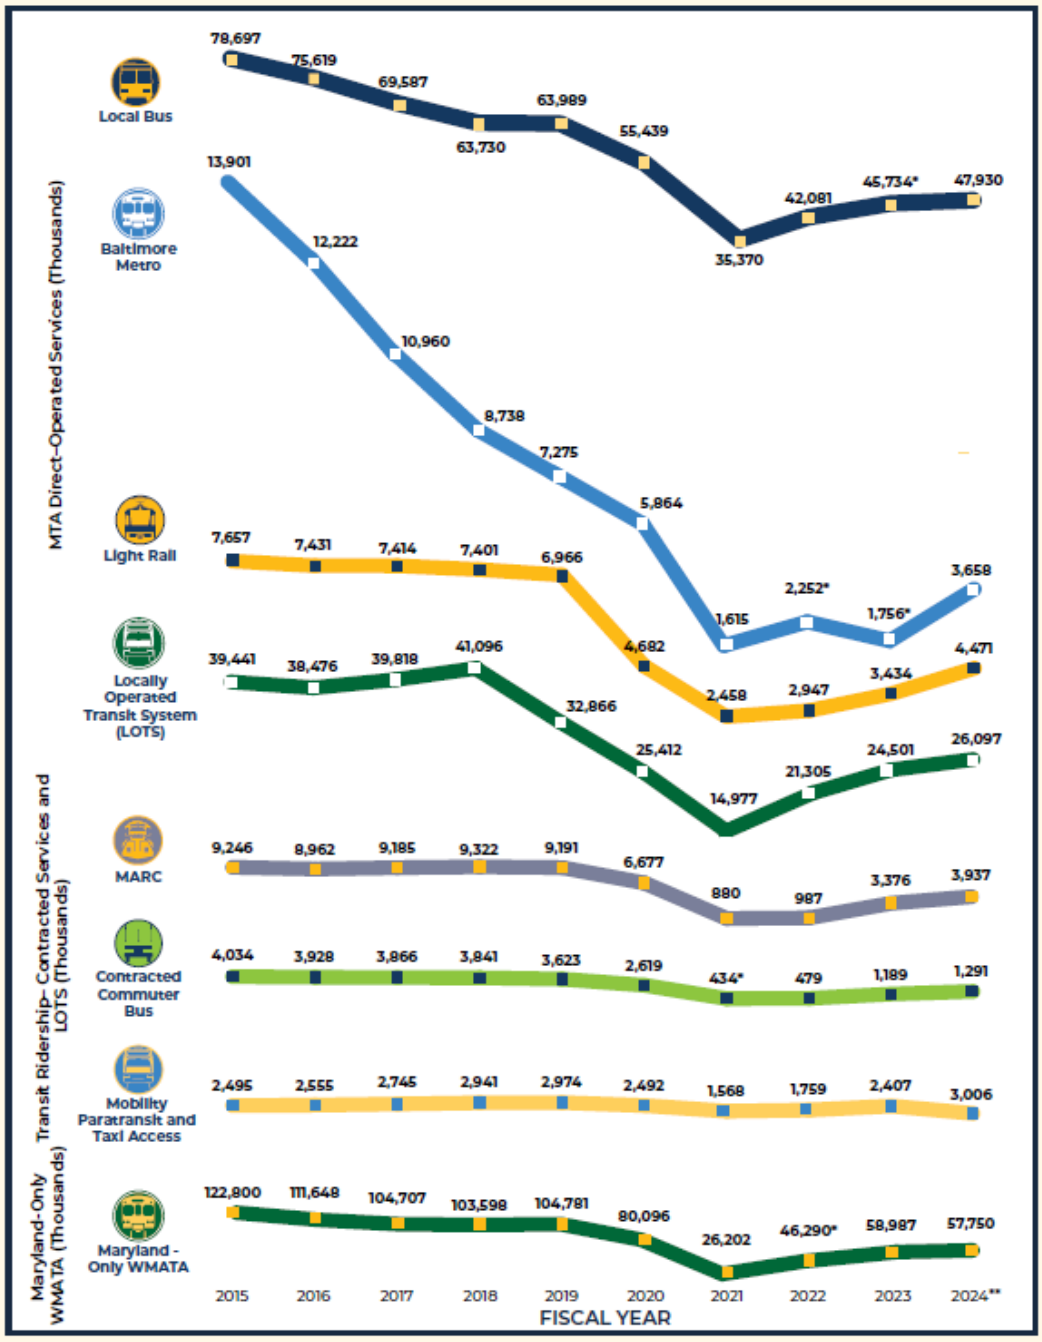

### What Are Future Strategies?

- SHA is investing in a new asset management system that will track individual assets at a more granular level. The new system will allow SHA to allocate funding properly based on a pragmatic/individual asset approach as opposed to a customer-based view of a roadway segment.

## Objective: Increase Transit Use, Active Transportation, and Transit-Oriented Development (TOD)

MAKING PROGRESS

### ANNUAL TRANSIT RIDERSHIP (THOUSANDS)

TARGET: OVERALL INCREASE

*Data have been revised from previous report.

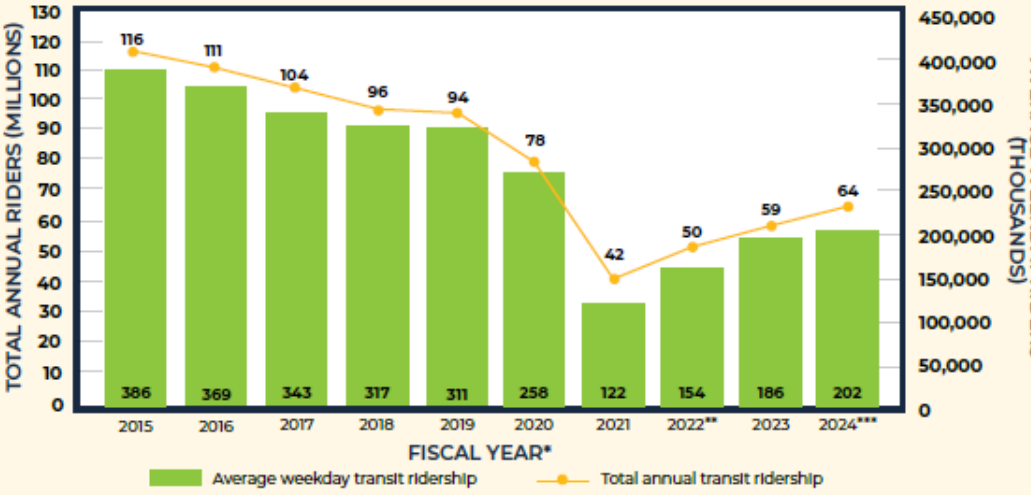

**2024 data is preliminary and subject to change.

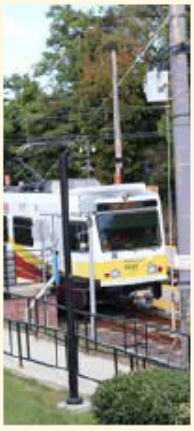

***This measure includes Metrorail, Metrobus and MetroAccess.

Note: Ridership is based on Unlinked Passenger Trips, which are the number of passengers who board public transportation vehicles. Passengers are counted each time they board vehicles no matter how many vehicles they use to travel from their origin to their destination.

## MTA AVERAGE WEEKDAY TRANSIT RIDERSHIP

MAKING PROGRESS

**TARGET: OVERALL INCREASE**

** To maintain the integrity of historical comparisons of bus ridership, MTA used ridership estimate differences between the new Automated Passenger Counter (APC) system and previous systems to adjust previous bus ridership estimates and allow for comparable data for fiscal years.*

*** 2022 total annual ridership has been revised from previous report.*

**** 2024 data are preliminary and subject to change.*

### What Is the Trend?

- In FY 2024, MTA saw overall ridership improve across all modes and the trend is expected to continue in future years. MTA predicts increases in rider usage across all modes as pandemic-related impacts continue to abate. Increased ridership in the future will equilibrate this measure to be more consistent with pre-pandemic trends. In light of commuting patterns showing a decrease in transit commuters in the previous measure, this may point to transit being used more often for non-work trips. Additionally, the ACS commute mode share data is from 2023, which is older than the more up to date FY 2024 MTA ridership data.
- Out of the top 25 US transit agencies based on daily ridership between January and August, MTA had the largest year-over-year change (11.5%) between 2023 and 2024.
- Maryland-only WMATA ridership decreased steadily from 122.8 million in FY 2015 to a low of 26.2 million in FY 2021 due to the pandemic but has since seen a gradual recovery. However, FY 2024 ridership of 57.7 million shows a 2.1% decrease from FY 2023.
- The slower rate of recovery compared to the initial decline points and toward the transportation landscape that may have changed permanently due to shifts in work patterns and travel behavior.

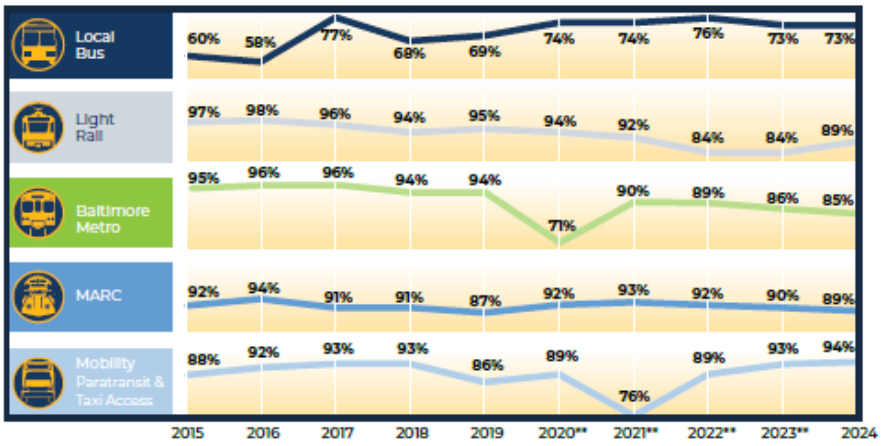

### What Are Future Strategies?

- In June 2023, Governor Moore announced the re-launch of the Red Line project, a proposed premium transit corridor between Woodlawn, downtown Baltimore and Bayview. Light Rail was selected to advance to a detailed environmental study and ultimately apply to enter the Federal Transit Administration (FTA) Capital Investments Grants program.
- MDOT, in partnership with the Maryland Economic Development Corporation, announced the Penn Line TOD Strategy Plan, which presents recommendations for the development of 170 acres of undeveloped State-owned land around Penn Line stations.
- MTA continues to advance construction on the Purple Line, a 16-mile light rail line from New Carrollton to Bethesda and is now more than 65% complete, and light rail vehicles have started to arrive in Maryland. The Purple Line will open in late 2027.
- MTA continues to add new routes strategically, such as the QuickLink 40, to boost service usage among riders. MTA continues to interface with its riders to understand better how they can develop service around their needs and demands.
- MTA received $20 million in federal grants for the Mondawmin Mobility Hub and $8.8 million for the Penn-Camden Connector.
- WMATA continued work on the Better Bus Network Redesign, which will develop a new regional bus network that serves customer needs better and regional goals by being fast, frequent, reliable and easier to understand.

## Objective: Minimize Travel Delays and Improve Reliability and Quality

FACING CHALLENGES

### PERCENT OF ALL MDOT TRANSIT SERVICE PROVIDED ON-TIME

TARGET: 2030: 99% FOR ALL EXCEPT LOCAL BUS; 2050: 90%

** MARC and Metro data have been revised from previous report.*

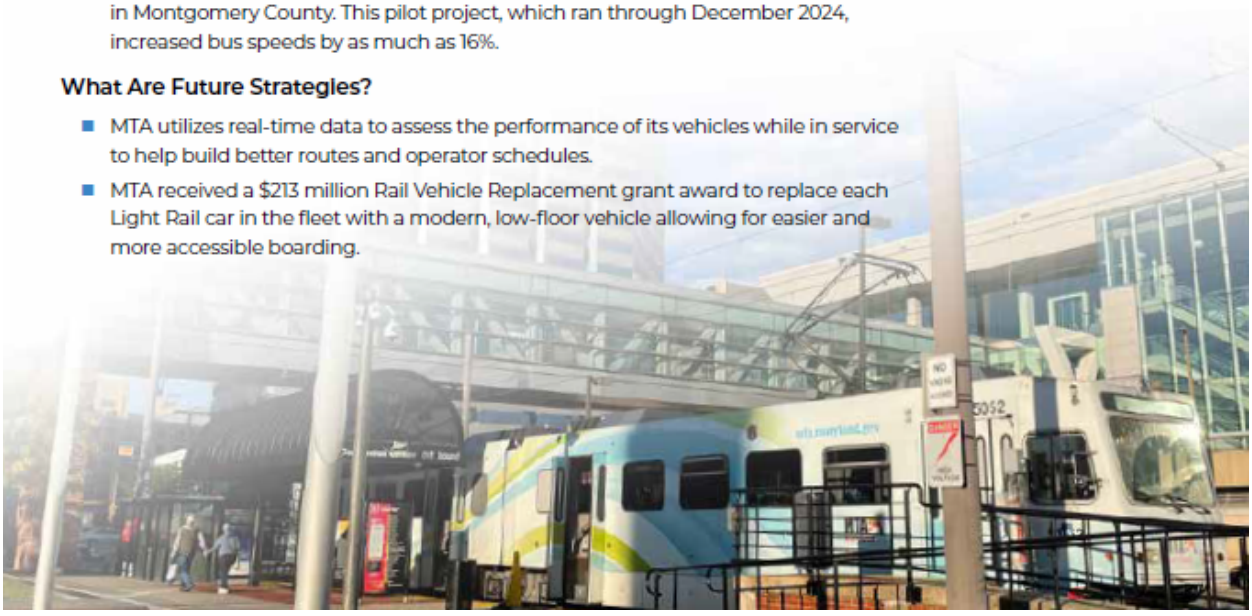

*** 2020, 2021, 2022 and 2023 data have been revised from previous report.*

### What Is the Trend?

- In 2024, on-time performance (OTP) for Light Rail experienced substantial improvement, increasing from 84% in 2023 to 89% in 2024, while OTP for Baltimore Metro and MARC decreased by 1%.
- MDOT signed framework agreements with Delaware and Virginia to expand Maryland Area Rail Commuter (MARC) train service north and south and improve regional connectivity.
- MTA offers a free subscription to the Transit Royale version of its transit app, which includes access to upcoming departures for transit lines, route maps and vehicle tracking.
- Starting summer 2024, SHA, WMATA and the Montgomery County Department of Transportation teamed up to create bus-only lanes along Georgia Avenue in Montgomery County. This pilot project, which ran through December 2024, increased bus speeds by as much as 16%.

### What Are Future Strategies?

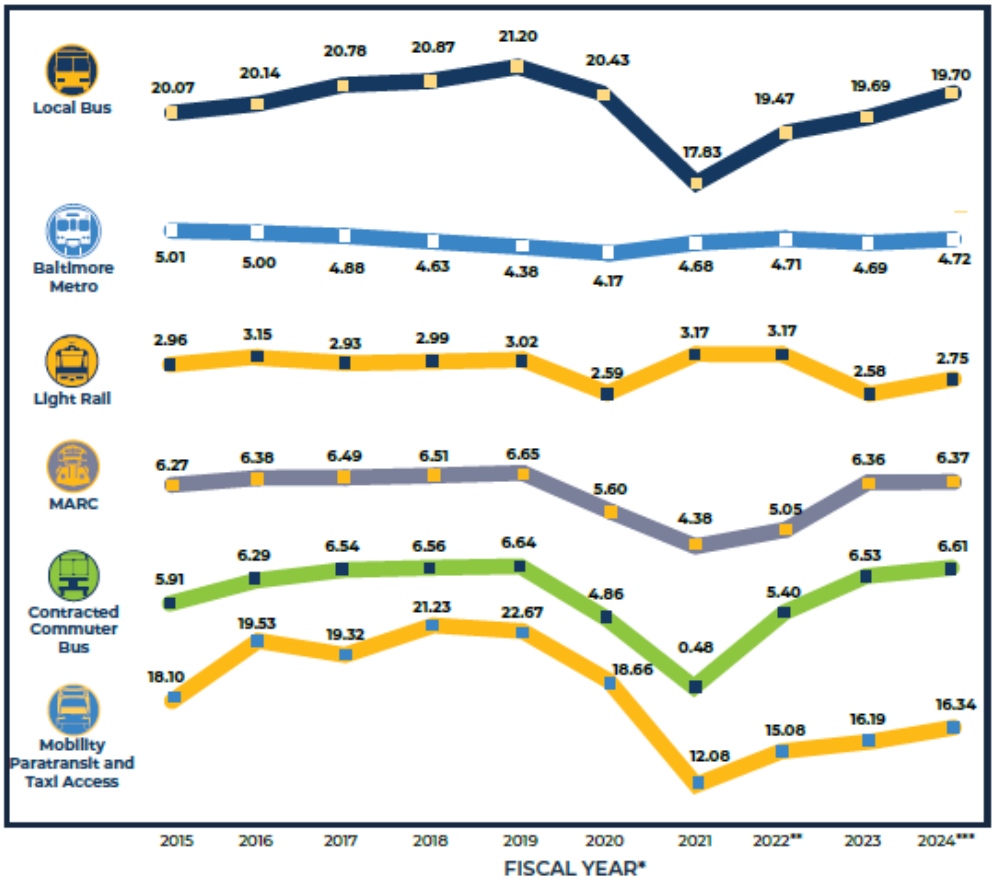

- MTA utilizes real-time data to assess the performance of its vehicles while in service to help build better routes and operator schedules.
- MTA received a $213 million Rail Vehicle Replacement grant award to replace each Light Rail car in the fleet with a modern, low-floor vehicle allowing for easier and more accessible boarding.

## ANNUAL REVENUE VEHICLE MILES OF MTA SERVICE PROVIDED*

MAKING PROGRESS

Revenue vehicle miles measure each mile for which a transit vehicle is in service and accepting customers. This measure indicates transit's level of service.

TARGET: OVERALL INCREASE

** All units are revenue miles (millions). Excludes Locally Operated Transit Systems (LOTS) and WMATA.*

*** 2024 data are preliminary and subject to change.*

### What Is the Trend?

- The annual revenue vehicle miles of MTA service is now operating near pre-pandemic levels across all transit modes and has been increasing overall since 2021. The exceptions are paratransit and taxi access, which have not yet reached pre-pandemic levels, and light rail, which was higher than pre-pandemic levels in 2021 and 2022 but saw a decrease in 2023 and its lowest level since 2015 in 2024.

BMORE BUS
Better Buses
Better Baltimore

### What Are Future Strategies?

- MTA has launched BMORE BUS, a transit plan for the Baltimore region that identified bus service improvements that could be possible with expanded resources during the next 10 years.
- MTA also is moving forward on planning for the Red Line and completing construction of the Purple Line light rail project. New project leadership teams were announced in September 2023 to push these projects towards implementation.
- The MARC Growth and Transformation Plan is under development and will shape a refreshed vision and objectives, findings from market analysis and equity assessments, recommendations for necessary capital improvements, and implementation strategies for MARC.

## APPENDIX K – Public Outreach and Comments

The Maryland Department of Transportation released the Statewide Transportation Improvement Program (STIP) for a 30-day public comment period from March 7, 2025 through April 7, 2025. The Press Release was sent to around 150 different news organizations covering internet, print, radio, and television.

**FOR IMMEDIATE RELEASE**

**Contact:** Maryland Department of Transportation Office of Public Affairs
David Broughton, 410-865-1029

### Maryland Department of Transportation Releases Draft Statewide Transportation Improvement Program for Public Comment

*Program Includes Federally Funded Surface Transportation Projects*

**HANOVER, MD (March 7, 2025) –** The Maryland Department of Transportation today released its draft Statewide Transportation Improvement Program (STIP), which compiles State, local and regional highway and transit projects that are federally funded and planned for study and construction over the next four years. The public comment period will be open through April 4, 2025.

"These transportation projects are essential to better connect communities, improve the quality of life for all Marylanders and drive the economic vitality of the State," said Maryland Transportation Secretary Paul J. Wiedefeld. "It's critical that we receive input from the public to help us refine and update those investments with our local and regional partners and ensure Maryland's transportation system is efficient and accessible for all Marylanders."

The draft STIP can be found at www.mdot.maryland.gov/STIP.

The document includes a comprehensive list of State, local and regional surface transportation projects that are federally funded. Those include projects that are detailed in the Department's six-year transportation budget known as the Consolidated Transportation Program (CTP), in each of Maryland's six regional metropolitan planning organization's Transportation Improvement Programs, and federally funded projects in non-metropolitan areas.

Maryland is federally required to update the STIP every four years; however, the Department develops a new STIP about every two years and solicits comments in accordance with federal law. The STIP was last updated in 2022.

The public can comment by emailing MDOTRegionalPlanning@mdot.maryland.gov, or sending a letter addressed to STIP Comments, Office of Planning, Programming and Project Delivery, Maryland Department of Transportation, 7201 Corporate Center Drive, Hanover, Maryland 21076. This is the final phase of public comments on the Fiscal Year 2025 STIP, before it is submitted to the U.S. Department of Transportation for approval.

FY2025–FY2028
MARYLAND STATEWIDE TRANSPORTATION IMPROVEMENT PROGRAM

# Maryland Department of Transportation Releases Draft Statewide Transportation Improvement Program for Public Comment

The Maryland Department of Transportation today released its draft Statewide Transportation Improvement Program (STIP), which compiles State, local and regional highway and transit projects that are federally funded and planned for study and construction over the next four years. **The public comment period has been extended and will be open through April 7, 2025**.

The draft STIP can be found here.

The document includes a comprehensive list of State, local and regional surface transportation projects that are federally funded. Those include projects that are detailed in the Department's six-year transportation budget known as the Consolidated Transportation Program (CTP), in each of Maryland's six regional metropolitan planning organization's Transportation Improvement Programs, and federally funded projects in non-metropolitan areas.

Maryland is federally required to update the STIP every four years; however, the Department develops a new STIP about every two years and solicits comments in accordance with federal law. The STIP was last updated in 2022.

The public can comment by emailing MDOTRegionalPlanning@mdot.maryland.gov, or sending a letter addressed to STIP Comments, Office of Planning, Programming and Project Delivery, Maryland Department of Transportation, 7201 Corporate Center Drive, Hanover, Maryland 21076. This is the final phase of public comments on the Fiscal Year 2025 STIP, before it is submitted to the U.S. Department of Transportation for approval.

The following is a list of the public comments received during the 30-day public comment period between March 7, 2025 and April 7, 2025.

| Comment Received | Who Made Comment | Edits/Changes | STIP Reference |
|---|---|---|---|
| Overall, adjusted pages for better page breaks | STIP Team | Formatting | Overall |
| Wanted to Show Public Outreach and Engagement Initiatives on Social Media | STIP Team | Added Social Media Outreach images | Section 1, Chapter 5 |
| Wanted to share social media links | STIP Team | Added Social Media Outreach Links | Section 1, Appendix L |
| Asked to adjust regulatory references in Appendix A – Self-Certification | FHWA | Adjusted Self-Certification language | Section 1, Appendix A |
| Asked to extend the public comment period from April 4 to April 7 to ensure the full 30-day public comment period | FHWA/ FTA | Updated social media outreach, extending public comment period to April 7, 2025 | Section 1, Chapter 5 and Appendix K |
| Asked to update Transit Performance Measures Tables | FTA | Updated Tables | Section 1, Appendix J |
| Why are I-495 and I-270 widening not identified in the STIP? | David K. | Since this project is in the National Capital Region, you can find the project details and funding in the FY23-FY26 TPB TIP Project #11582, and most recently updated in the STIP, STIP Modification #22-136 on June 7, 2024. | Section 2, see BRTB TIP |
| Pleased to see inclusion of a bike path between Westover and Marion in Somerset County, would like to see more landscaping, shrubbery, and butterfly plantings. | Patricia V. | Thank you for your comment. This comment has been shared with the MDOT Active Transportation Team. | N/A |
| Comment supports Recreational Trails Program, Kim Lamphier Bikeways Program, Transportation Alternatives Program, and PSAP Program trails included in the STIP.<br><br>Comments request the advancement of the ATTIP grant application for the Susquehanna River pedestrian and bicycle crossing feasibility study.<br><br>Comments request the advancement of trails projects including trail connection segments in Cecil Co./WILMAPCO, trail | Daniel P. (East Coast Greenway Alliance) | Thank you for your comments. These comments have been shared with the MDOT Active Transportation Team, as well as with the three MPOs mentioned in your comments.<br><br>There are no ongoing ATTIP grant applications for the Susquehanna River pedestrian and bicycle crossing feasibility study. We will continue to pursue other possible funding opportunities as feasible.<br><br>The MDOT Active Transportation Team has met with county and city staff, continues to provide technical assistance and resources to counties/cities, and has included several of them on the Trails Plan Advisory Committee to better understand their challenges.<br><br>We encourage you to work with the local jurisdictions to ensure that the local jurisdictions can consider these in their transportation priority letters to the State. | N/A |

| | | | |
|---|---|---|---|
| segments along US 40 in Harford and Baltimore counties, trail gaps in Baltimore City, trail gaps in Anne Arundel Co., and trail connections in Prince George's Co. | | | |
| Inquiring about updates to the advancement of a new American Legion Bridge, I-495, and the I-270 Traffic Relief Plan. | Andre D. | Since this project is in the National Capital Region, you can find the project details and funding in the FY23-FY26 TPB TIP Project #11582, and most recently updated in the STIP, STIP Modification #22-136 on June 7, 2024. More information can be at: https://americanlegionbridge270.com/. Your comment has been shared with the Project Team. | Section 2, see TPB TIP |
| Widening of I-81 from two lanes to three lanes between Pennsylvania and West Virginia should be a priority for safety and truck movement. | Allan B. | Since this project is in the Hagerstown Metropolitan Region, you can find the project details and funding in the FY25-28 HEPMPO TIP Project #W2017-10, and was submitted as STIP Amendment #22-217 on April 2, 2025. | Section 2, see HEPMPO TIP |
| Researching STIPs and seeking information on the number of projects and total dollar amounts. | Steven M. | Thank you for your inquiry. This information is not compiled in one place as the STIP is a compilation of several documents. You can find State projects in the FY24-29 Consolidated Transportation Program (CTP), which can also be downloaded as a database here. MPO TIPs can be found by link in Section 2 of this STIP (page 149). Please visit www.mdot.maryland.gov/STIP for more information, including modifications and amendments to the current STIP. | N/A |
| A third lane is urgently needed on US 15 through Frederick. | Peter S. | Since this project is in the National Capital Region, you can find the project details and funding in the FY23-FY26 TPB TIP Project #6431, and most recently updated in the STIP, STIP Amendment #22-219 on April 2, 2025. | Section 2, see TPB TIP |
| Don't put tolls on I-495 or I-270, as they would be unaffordable and would not relieve congestion. The American Legion Bridge should be re-decked and stabilized, if not, replaced. No tolls to cross the bridge. Use innovative traffic management for I-270. | David K. | Since this project is in the National Capital Region, you can find the project details and funding in the FY23-FY26 TPB TIP Project #11582, and most recently updated in the STIP, STIP Modification #22-136 on June 7, 2024. More information can be found at: https://americanlegionbridge270.com/. Your comment has been shared with the Project Team. | Section 2, see TPB TIP |
| The STIP looks to be a comprehensive rolled up list of already-settled plans and projects already approved at the MPO and at the State with CTP. Why was the comment period extended and what effect could commenting on it possibly make? | Michael S. | Thank you for your comment. All comments are appreciated. We extended the comment period to April 7th in response from our federal partners, to ensure we covered the full 30-day public comment period. | N/A |
| Where can I find the information regarding the | Karla W. | The Chesapeake Bay Crossing Tier 2 NEPA Study is a National Environmental Policy Act (NEPA) study | N/A |

| | | | |
|---|---|---|---|
| replacement and planned new bridge for the William Preston Lane Jr. Memorial (Chesapeake) Bay Bridge in this STIP? | | underway by the Maryland Transportation Authority (MDTA). Since this is a study and not yet a project, it does not have federal funding yet and is therefore not yet included in a TIP or STIP. The Study is included in the Baltimore Metropolitan Region's Long-Range Transportation Plan, listed as Chesapeake Bay Crossing, Phase II NEPA. For more information on the Bay Crossing study, please visit: https://www.baycrossingstudy.com/. | |
| Update MVA to make MVA X account; install more vending machines at MVA; update laws to fix roads; and clean roads in Gaithersburg and Germantown | Social Media Post | Thank you for your comment. All comments are appreciated. MVA has an X account here: https://x.com/MD_MVA. Your comments have been shared with MDOT staff and MVA staff. | N/A |
| Promoting inclusion of the Proposed Civil War Rail Trail CWRT in appendices J & M. Advises that multimodal transportation options are better for the overall transportation planning network and emphasized the importance of Complete Streets and Multi-Modal Transportation Design Concepts and Standards. | Chip W. | Thank you for your comments. These comments have been shared with the MDOT Active Transportation Team, as well as the Highway and Transit teams. | N/A |

- Wicomico County
    - US 13 Bus, Salisbury Boulevard Bridge over East Branch Wicomico River Side Walk

**Retrofit Sidewalk Program**

- Anne Arundel County
    - MD 214, Central Avenue - MD 2 to MD 253
- Carroll County
    - MD 27, Manchester Road - West of MD 140 to Hahn Road
- Cecil County
    - MD 222, Perryville Road - Cedar Corner Road to St. Marks Church Road
    - MD 7, Delaware Avenue - MD 281 to South of Big Elk Creek Bridge
- Howard County
    - US 1, Washington Boulevard - Cedar Avenue to Crestmount Road
- Kent County
    - MD 514, Flatland Road - Chestertown Road to Sutton Way
- Statewide
    - Concrete Sidewalk and Pedestrian Improvements in Baltimore and Harford Counties

**Recreational Trails Program**

- Allegany County
    - Bear Ridge Trail Construction
    - Borden Tunnel Lining Restoration
- Anne Arundel County
    - Swan Creek Nature Trail West East Express Trail
- Baltimore County
    - Torrey C. Brown Trail Bridge Rehabilitation
- Garrett County
    - Burkholder Road ORV Trail Resurfacing Western Region State Forest Trail Maintenance Program
- Howard County
    - Patuxent Branch Trail Surface Upgrade
- Somerset County
    - Somers Cove Marina Reconstruction
- Talbot County
    - Easton Rail Trail Spur Construction
- Washington County
    - Washington County Regional Park Trail Construction
- Wicomico County
    - Pirates Wharf Trail Construction

**Kim Lamphier Bikeways Network Program**

- Anne Arundel County
  - Bay Ridge Avenue Bikeway
  - Broadneck Peninsula Trail (Phase 1B)
  - BWI to Odenton Shared Use Path Gaps
  - BWI Trail Spur Extension to Nursery Road
  - College Creek Connector
  - Poplar Trail Extension
  - Protected Bicycle Lane Delineators South Shore B&A Trail Gaps
- Baltimore City
  - Bike Counter Installation Program
  - Boston Street Connector
  - MLK Jr Sidepath Final Design
  - Rapid Enhancement Plan
- Baltimore County
  - Bloomsbury Crossing Construction Torrey C Brown/Jones Falls Trail Connection
- Carroll County
  - Biking Taneytown
- Charles County
  - La Plata Bikeway Construction
  - Smallwood Drive Path Design
- Dorchester County
  - Cambridge Bike Lane Study
- Frederick County
  - East Street Rails with Trails Phase 4
  - Frederick Pennsylvania Railroad Trail Phases 2 & 3
  - H&F Trail, Northern Branch
  - Monocacy MARC Shared-Use Path Feasibility Study
- Garrett County
  - Connecting Towns along MD 135 Oakland to Herrington Manor State Park Trail Feasibility Study
- Harford County

## Section 3: Federal Approvals

Please note that Section 3.0 provides the approval letters of the final FY 2025 – FY 2028 STIP, after review and after the 30-day public comment period. The final STIP and STIP Amendments and Modifications moving forward will be made available on the STIP website, located at: www.mdot.maryland.gov/STIP.

Hanover, Maryland 21076

**Re: Maryland Department of Transportation FY 2025-2028 Statewide Transportation Improvement Program (STIP)**

Dear Secretary, Wiedefeld:

We are pleased to inform you that the joint Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) review of the Maryland Department of Transportation (MDOT) FY 2025-2028 Statewide Transportation Improvement Program (STIP) has been completed. In accordance with 23 CFR 450.218(a), the approval period for a new STIP shall not exceed four years. As a result, this joint FHWA/FTA approval of the Maryland STIP applies to the period FY 2025 through FY 2028.

To approve the STIP document, including the Transportation Improvement Programs (TIP) contained by reference or directly in the STIP, the FHWA and FTA must make a determination that the STIP and each metropolitan TIP are based on a continuing, cooperative and comprehensive planning process. This Planning Finding is based upon the extent that all projects in the STIP are based on a planning process in accordance with 23 U.S.C. 134 and 135, 49 U.S.C. 5303-5305, and subparts A, B, and C of 23 CFR Part 450.

This is the documented Planning Finding for the MDOT FY 2025-2028 STIP, and all incorporated TIPs for the following Metropolitan Planning Organizations (MPO): Baltimore Region Metropolitan Planning Organization, Metropolitan Washington Region Metropolitan Planning Organization, Wilmington Area Planning Council, Hagerstown/Eastern Panhandle Metropolitan Planning Organization, Calvert-St. Mary's Metropolitan Planning Organization and Salisbury/Wicomico Metropolitan Planning Organization.

Based on the MDOT and MPO self-certifications of their statewide and metropolitan transportation planning processes, review of self-certification supporting documentation, as well as our involvement in the State and Metropolitan planning processes, FHWA and FTA hereby find that the STIP is based on a transportation planning process that substantially meets the

requirements of 23 U.S.C Sections 134 and 135, 49 U.S.C. Sections 5303-5305, and subparts A, B, and C of 23 CFR Part 450.

This STIP approval does not constitute a final commitment of Federal funds. Federal funding for projects included in the STIP is finalized when a request for project authorization is approved by FHWA or upon approval of a grant award by FTA. Should amendments to this STIP become necessary during the course of the year, any highway amendments will be acted upon by FHWA and any transit amendments will be acted upon by FTA.

Any questions concerning this approval should be directed to Jasmine Champion, Planning & Program Manager, FHWA Maryland Division, at (410) 779-7158, or Dan Koenig, Community Planner, DC Metro Office, at (202) 366 8224.

Sincerely,

# 2025 MARYLAND STIP PLANNING FINDING ISSUED BY FTA AND FHWA FOR STATEWIDE AND METROPOLITAN TRANSPORTATION PLANNING PROCESSES

To approve the State Transportation Improvement Program (STIP)document, including Transportation Improvement Programs (TIP) contained by reference or directly in the STIP, the Federal Transit Administration (FTA) and the Federal Highway Administration (FHWA) must make a determination that each metropolitan TIP is based on a continuing, cooperative, and comprehensive planning process. In addition, this Planning Finding is based on statewide and metropolitan transportation planning processes that meet the intent and requirements of the FAST Act; 23 U.S.C. Sections 134 and 135; 49 U.S.C. Sections 5303-5305; and 23 CFR part 450 subpart A, B and C. This is the documented Planning Finding for the Maryland FY 2025-2028 STIP, and all the incorporated TIPs.

PLANNING PROCESS OBSERVATIONS AND SUGGESTED IMPROVEMENTS

The following strengths of the statewide and metropolitan transportation planning processes have been identified:

- Commend MDOT for establishing recurring meetings with FHWA & FTA partners to discuss Maryland's transportation planning program updates, current efforts, and initiatives. Also, for maintaining the quarterly roundtable meetings with MPOs and stakeholders.

- Commend MDOT for extensive coordination and effort to disband the Cumberland Area Metropolitan Planning Organization (CAMPO). In November 2024, the population for CAMPO fell below the federal 50,000-threshold to designate a MPO. In coordination with CAMPO, MDOT has reprogrammed CAMPO projects as part of MDOT rural projects and updated the project STIP numbers for future tracking. Also, MDOT updated the distribution formulas for metropolitan planning (PL) funds allocations to MPOs based on the 2020 Census as recommended in the FY22-25 STIP update.

- Commend MDOT for implementing an identified area of improvement to submit regularly and on time Areawide Group project tracking reports.

The following areas of the statewide and metropolitan transportation planning processes have been identified for improvement by the next STIP update:

- The State should continue to work with the MPOs to better align the development of new TIPs to coincide with the development of the new STIP and choose for the STIP to be approved either on the State or Federal Fiscal Year. MDOT and its planning partners, should ensure that each approved TIP, includes all project phases for included projects.

- In February 2025 MDOT provided Maryland MPOs with their respective MPO Annual Listing of Obligated projects for FY23. The FY24 is still pending. Per CFR 450.334, this listing shall be prepared in accordance with § 450.314(a) and shall include all federally funded projects authorized or revised to increase obligations in the preceding program year, and shall at a minimum include the TIP information under § 450.326(g)(1) and (4)

and identify, for each project, the amount of Federal funds requested in the TIP, the Federal funding that was obligated during the preceding year, and the Federal funding remaining and available for subsequent years. This is to be done on an annual basis no later than 90 days following the end of the program year in coordination with the State, public transportation operator(s), and the MPO.

- MDOT's ongoing efforts to enhance the quality of STIP development and management are commendable. However, we recommend that the State strengthen internal coordination between the Federal Aid and Planning Offices to ensure the development of consistent and clear project descriptions, as well as clearly defined actions requested in FMIS approvals. The Division Office frequently encounters challenges in reviewing and approving projects in FMIS due to unclear descriptions of required actions and inconsistencies in the requested funding amounts.

- We recommend that the State update Section 2 of the STIP whenever there is an update to a MPO TIP.

- We recommend that the State continue to refine how the STIP achieves performance targets identified in the "Playbook" Maryland's statewide long-range transportation plan and the Annual Attainment Report, to ensure that investment priorities are linked to associated performance targets.

- We recommend that MDOT, MTA, the MPOs, and the providers of public transportation update planning agreements which identifies their mutual responsibilities in carrying out the metropolitan transportation planning process. These agreements must also include specific provisions for the development of financial plans that support the LRTP and TIP, and written provisions on meeting performance measure requirements (if not documented elsewhere).

- We recommend that MDOT, MTA, the MPOs, and the public transportation providers identify ways to strengthen multimodal planning, communication, and collaboration. There were some inconsistencies with how transit projects are reflected on some of the TIPs and how fiscal constraint is demonstrated together with the transit financial capacity analysis.

Feedback from Federal partners on the draft STIP and how it was addressed is listed below.

| STIP Section | STIP Chapter | Feedback Received | Edits/Changes |
|---|---|---|---|
| General | N/A | It is recommended that state and Federal program/policy references be updated as needed to reflect recent changes. | State and Federal program/policy details have been added/adjusted to date. |
| General | N/A | Double check that all acronyms are listed accurately. | Acronyms have been checked and updated as needed. |
| General | N/A | Double check all hyperlinks are working. | Hyperlinks have been checked and updated where needed. |
| 1 | 1.0 Introduction, 3.0 Key Transportation Planning Documents, and 4.0 Maryland's Statewide Transportation Improvement Program (STIP) | Detail should be provided on how MTP, CTP, and MPO TIP processes relate to the STIP. | Text has been adjusted to clarify the STIP development process and how it relates to MTP, CTP, and MPO TIP development. |
| 1 | 1.0 Introduction | It is unclear where regionally significant projects can be found within the STIP. | Text has been added to reference that regionally significant projects are listed in Section 2 of this document. |
| 1 | 4.0 Maryland's Statewide Transportation Improvement Program (STIP) | Are matching funds estimated reasonably likely to be available? | Text has been added to describe sources for matching funds. |
| 1 | 4.0 Maryland's Statewide Transportation Improvement Program (STIP) | STIP Development Process – show better linkage to MTP, CTP, LRTP, and TIP | Updated STIP Development Figure 4.1 which shows all the processes incorporated together. |
| 1 | 4.0 Maryland's Statewide Transportation Improvement Program (STIP) | Clarity needed on CTP, TIP, and STIP reconciliation. | Text has been added showing how projects are incorporated into the MPO planning and programming documents and reconciled budgetarily in MDOT's annual CTP. |
| 1 | 5.0 Linking the STIP to Federal Regulations and Transportation Authorizations | Confirm CRP program specifics. | Done |
| 1 | 5.0 Linking the STIP to Federal Regulations and Transportation Authorizations | (l) Financial Plan | Text has been added to detail the authorization and use of Tol Credits in MDOT's federal state split for certain projects. |
| 1 | 5.0 Linking the STIP to Federal Regulations and Transportation Authorizations | In light of MD budget shortfalls anticipated, detail should be added on how budgets are being forecasted. | Text has been regarding the process for forecasting budgets. |
| 1 | 5.0 Linking the STIP to Federal Regulations and Transportation Authorizations | (m) Financial Constraint | Text has been added detailing MTA's process |

| | | | |
|---|---|---|---|
| 1 | Appendix B – SHA Financial Constraint Summary Tables | Detail should be added regarding how MDOT is tracking competitive grants | Text has been added to the list of SHA revenue uses and to the top of the areawide descriptions in Appendix I. |
| 1 | Appendix C – MTA Financial Constraint Summary Tables | Please include a methodology for transit constraint similar to SHA. It looks like 5329 funding is missing as well. | |
| 1 | Appendix C – MTA Financial Constraint Summary Tables | Detail should be added on which discretionary sources are being outlined | Text has been added. |
| 1 | Appendix D – Fiscal Constraint by Metropolitan Planning Organization | Financials for the 3 year period should be outlined | Additional details have been added to MTA's tables, and FY26-28 tables have been included as well.<br><br>SHA tables will have to be added at a later date, as information was not available.<br><br>Text was added detailing how the Bridge Formula Program appropriations are handled. |
| 1 | Appendix F – Federal Funding Sources | Please add 5329 funding | Done. |
| 1 | Appendix I – SHA Rural Projects (Non-MPO and Statewide) | Several edits needed on federal fund sources, project descriptions, and explanations on higher federal shares on rural projects. | Areawide project descriptions have been updated, federal fund sources identified, and notes have been added to the projects utilizing Toll Credits |
| 1 | Appendix J – National and State Performance Management Goals | PBPP requirements description and PTASP measures and targets need to be added | Missing summary language PTASP description and targets table have been added. |
| 1 | Appendix J – National and State Performance Management Goals | The anticipated effect of implementing the STIP toward achieving the performance targets identified in the state's MTP and linking investment priorities to performance targets needs to be described in more detail. | Clarifying language has been added. |
